Enlisting to become a Special Forces suborbital paratrooper, Craig is selected to take part in the most important mission in American military history—a sortie into enemy territory to eliminate the world's first strong Artificial Intelligence. The mission is only the beginning of Craig's story, and for the story of humanity as well, as they accelerate towards a world that is post-human.

Human Plus is Book 4 in the smash hit science fiction series. Not exactly a sequel, not exactly a prequel, Human Plus will defy expectations. No matter what you thought was coming next, you're in for a surprise!

The author's lifetime of insight as the leading authority on slavery in the Western world is summed up in this compelling narrative that links together the profits of slavery, the pain of the enslaved, and the legacy of racism in a sweeping and compelling history of the institution of slavery in the United States. By the Pulitzer Prize-winning author of The Problem of Slavery in Western Culture.

In this sequel to Post-Human, humanity will be forced to face a future more advanced than it could have imagined if it wants to survive. Nineteen months have passed since the A.I. turned against humanity and was subsequently destroyed. In the meantime, James Keats has turned over the A.I.'s powers to a non-intelligent, easily controlled operating system. He and Thel have left the planet and spent six months vacationing on Venus, which has been newly terraformed without the consent or knowledge of the Governing Council. The A.I. has been deleted, but the message it sent out into the abyss of space in search of a companion has been answered. An alien force dwarfing the Earth is on its way to find out why the A.I. has stopped communicating. Keats and company can only assume its intentions will be hostile when it finds out the truth. Only one thing is for sure: nothing will ever be the same again. Welcome to the Trans-Human era. Welcome to the singularity. "A thought-provoking, energetic sci-fi book, with a robust dose of high-octane exploits." -By A.F. Stewart, author of Chronicles of the Undead

In this edgy thriller, a creature pretending to be God tricks dying people with a heavenly white light – only to consume their souls forever. But CIPHER, Han, Natalie, and Father Hurley know the truth – can they save humanity from its terrifying fate?

Inhuman is Book 5 in the best-selling, smash hit phenomenon, Post-Human series. In this nearly 400 pages, 109k word epic story. Readers will get to rejoin all of the characters they fell in love with along the way in the previous 4 books. Inhuman not only ties the first four books together, it also introduces a new villain, one that has been lurking in the background throughout, and that will trump any villain in the history of literature, film, or comics. V-SINN is its name, and, this time, it may just be too much for the post-humans to handle. Inhuman is to the Post-Human series as The Empire Strikes Back was to Star Wars--the middle act when revelations emerge, old sins come back to haunt, and the journey of the heroes that readers have fallen in love with deepens, darkens, and entertains to a whole new level. Post-Human fans will not be disappointed with this epic middle act! Enjoy!

'A must read ... a new analytical agenda for the Anthropocene, coherently drawing out the power of thinking with islands.' - Elena Burgos Martinez, Leiden University 'This is an essential book. [The] analytics they propose ... offer both a critical agenda for island studies and compass points through which to navigate the haunting past, troubling present, and precarious future.' - Craig Santos Perez, University of Hawai'i, Manoa 'All academic books should be like this: hard to put down. Informative, careful, sometimes devastating, yet absolutely necessary - if you read one book about the Anthropocene let it be this. You will never think of islands in the same way again.' - Kimberley Peters, University of Oldenburg '... a unique journey into the Anthropocene. Critical, generous and compelling'. - Nigel Clark, Lancaster University The island has become a key figure of the Anthropocene - an epoch in which human entanglements with nature come increasingly to the fore. For a long time, islands were romanticised or marginalised, seen as lacking modernity's capacities for progress, vulnerable to the effects of catastrophic climate change and the afterlives of empire and coloniality. Today, however, the island is increasingly important for both policy-oriented and critical imaginaries that seek, more positively, to draw upon the island's liminal and disruptive capacities, especially the relational entanglements and sensitivities its peoples and modes of life are said to exhibit. Anthropocene Islands: Entangled Worlds explores the significant and widespread shift to working with islands for the generation of new or alternative approaches to knowledge, critique and policy practices. It explains how contemporary Anthropocene thinking takes a particular interest in islands as 'entangled worlds', which break down the human/nature divide of modernity and enable the generation of new or alternative approaches to ways of being (ontology) and knowing (epistemology). The book draws out core analytics which have risen to prominence (Resilience, Patchworks, Correlation and Storiotion) as contemporary policy makers, scholars, critical theorists, artists, poets and activists work with islands to move beyond the constraints of modern approaches. In doing so, it argues that engaging with islands has become increasingly important for the generation of some of the core frameworks of contemporary thinking and concludes with a new critical agenda for the Anthropocene.

The singularity: the point in human history when we begin to enhance our own intelligence with the intelligent technology we're creating. As humanity merges with its machines, will we forget what it means to be human? Meet Haalee, the artificial intelligence charged with taking humanity on the road to the singularity. But will the future turn out the way she expects? Dawn of the Singularity is the intelligent, action-packed science fiction thriller you've been waiting for. From award-winning and best-selling scifi author, David Simpson, get ready for the mystery, the thrills, and the adventure of the future to come.

From writer Cazzie David comes a series of acerbic, darkly funny essays about misanthropy, social media, anxiety, relationships, and growing up in a wildly eccentric family. For Cazzie David, the world is one big trap door leading to death and despair and social phobia. From shame spirals caused by hookups to panic attacks about being alive and everyone else having to be alive too, David chronicles her life's most chaotic moments with wit, bleak humor, and a mega-dose of self-awareness. In No One Asked for This, David provides readers with a singular but ultimately relatable tour through her mind, as she explores existential anxiety, family dynamics, and the utterly modern dilemma of having your breakup displayed on the Internet. With pitch-black humor resonant of her father, comedy legend Larry David, and topics that speak uniquely to generational malaise, No One Asked for This is the perfect companion for when you don't really want a companion.

Taking refuge in fairy tales after the loss of his mother, twelve-year-old David finds himself violently propelled into an imaginary land in which the boundaries of fantasy and reality are disturbingly melded. By the author of The Black Angel. 75,000 first printing.
