He also did a promotional tour with the International Show Company (now INTERCO), which agreed to make him shoes for free. This was a blessing for Robert, who had whopping 47-cm-long (18.5-ft) feet - ...

Master the practical aspects of the CFA Program Curriculum with expert instruction for the 2017 exam The same official curricula that CFA Program candidates receive with program registration is now publicly available for purchase. CFA Program Curriculum 2017 Level II, Volumes 1-6 provides the complete Level II Curriculum for the 2017 exam, with practical instruction on the Candidate Body of Knowledge (CBOK) and how it is applied, including expert guidance on incorporating concepts into practice. Level II focuses on complex analysis with an emphasis on asset valuation, and is designed to help you use investment concepts appropriately in situations analysts commonly face. Coverage includes ethical and professional standards, quantitative analysis, economics, financial reporting and analysis, corporate finance, equities, fixed income, derivatives, alternative investments, and portfolio management organized into individual study sessions with clearly defined Learning Outcome Statements. Charts, graphs, figures, diagrams, and financial statements illustrate complex concepts to facilitate retention, and practice questions with answers allow you to gauge your understanding while reinforcing important concepts. While Level I introduced you to basic foundational investment skills, Level II requires more complex techniques and a strong grasp of valuation methods. This set dives deep into practical application, explaining complex topics to help you understand and retain critical concepts and processes. Incorporate analysis skills into case evaluations Master complex calculations and quantitative techniques Understand the international standards used for valuation and analysis Gauge your skills and understanding against each Learning Outcome Statement CFA Institute promotes the highest standards of ethics, education, and professional excellence among investment professionals. The CFA Program Curriculum guides you through the breadth of knowledge required to uphold these standards. The three levels of the program build on each other. Level I provides foundational knowledge and teaches the use of investment tools; Level II focuses on application of concepts and analysis, particularly in the valuation of assets; and Level III builds toward synthesis across topics with an emphasis on portfolio management.

Large, diversified firms face unique challenges as they compete worldwide, and corporate restructuring is one way multinationals strive for competitive advantage. Weighing the pros and cons of a variety of approaches to restructuring, *Downscoping* offers executives a clear, strategic path through the maze. The authors show that when a multinational conglomerate fails to compete effectively, too much diversification may be the culprit. Whether the result of weak corporate governance or poor corporate strategy, over-diversification can make managers, unfamiliar with some of the markets in which they compete, opt for safety over innovation. This risk-aversion and lack of long-range commitment to innovation lead inevitably to stagnation over the longer term. The answer is not downsizing--closing offices and laying off personnel--but downscoping: a strategic approach to restructuring. The options include incentive and compensation adjustments for executives, leveraged buy-outs and capital structure changes, focusing on core skills, diversifying internationally while focusing on businesses in which a firm has strong competencies, and buying and selling mature businesses where product development is not a great concern. Regardless of the approach, executives must exercise strategic leadership during and after restructuring, including providing strategic direction, exploiting core competencies, developing human capital, and sustaining the corporate culture. Based on systematic research rather than casual observation, *Downscoping* provides a strong description of restructuring alternatives and their resulting tradeoffs. Its specific guidelines for maintaining competitiveness will be essential reading for managers involved in corporate restructuring.

Ensuring that higher education students are fully prepared for lives as global citizens is a pressing concern in the contemporary world. This book draws on insights from cosmopolitan thought to identify how people from different backgrounds can find common ground. By applying cosmopolitan insights to higher education practice, Sarah Richardson charts how students can be given the opportunity to experience a truly international education, which emphasises deep cultural exchange rather than mere transactional contact. Written in an engaging and accessible style, the author uses empirical evidence to show that simply studying alongside those different to themselves or studying overseas are inadequate in preparing students to lead the diverse societies of tomorrow. Instead, the book calls for a coherent approach to higher education that properly prepares students to lead global lives. Chapters highlight a number of key aspects of higher education practice, from curriculum to pedagogy, to educator skills to assessment, and demonstrate how these can be reconsidered to give students the opportunity to gain cosmopolitan attributes during their higher education. *Cosmopolitan Learning for a Global Era* will be of great interest to researchers, scholars and postgraduate students, with a particular focus on cosmopolitan thought, international education and higher education more broadly, as well as university educators and leaders across a wide range of disciplinary areas.
