This important collection of classic articles and papers presents a variety of perspectives on key topics in international security and conflict. These include how

Online Library International

the structure of the international system constrains nations ' choices, how domestic politics may affect decisions on war and peace, how individual and small group behaviour can affect foreign policy, and how international organizations can affect the security of states and peoples.

Online Library International

Some of the selections are classics, but most represent recent research and analysis. They draw on international scholars working from different kinds of theories (realist, liberal-institutionalist and constructivist) and research methods to ask why nation-

This book examines
Arab approaches to
mediation,
negotiation and
settlement of political
disputes. This book
proposes that two
clusters of
independent variables
are potentially

Online Library International

responsible for the distinctive nature of Arab conflict resolution. Firstly, those linked with Arab political regimes and imperatives, and secondly those linked with Arab and /or Islamic culture. The text also focuses on the Arab League and its history of involvement in crisis

Online Library International

and conflict

situations, along with the roles of individual leaders, emissaries and extra-regional actors such as IGOs (Inter-Governmental Organisations) in undertaking mediation initiatives. IGO and Arab League activity has taken on new importance since the various

Online Library International

intervention attempts in connection with the 'Arab Spring' since 2011. During the negotiation process, most Arab regimes tend to view conflicts within a broad historical context and Islamic culture prioritises the cohesion of the community and internal stability of

Online Library International

the state over individual autonomy. This has created an authoritarian style of leadership, and in practice, leaders in the Middle East have had near absolute authority in the decision-making process—a fact which will have a lot of weight in conflict management and

Online Library International

whether peace will endure for a long period of time. This book is unique in studying these clusters through comparative systematic case study analysis of events prior to and subsequent to the 'Arab Spring', augmented by a quantitative analysis

Online Library International

of sample data on Arab disputes, compiled from a larger and newly augmented study comprising the years 1945-2000.

Complementary data from the Uppsala Conflict Data Program ' s (UCDP) data base of armed conflicts since 1975 is also utilized. This

Online Library International

book will be of much interest to students of conflict resolution, peace and conflict studies, Middle Eastern politics and IR in general.
