Get the entire history of the best trucks on the road. The International Truck and Engine Corporation has built the trucks that have been a staple of both agricultural and industrial trucking for nearly 100 years. International Harvester Trucks: The Complete History tells the complete story of the light-, medium-, and heavy-duty trucks, vans, and station wagons built by International Harvester during over a century of history, starting from the company's early days, through its first truck model in 1907, and right up to the present. The focus is firmly on the trucks themselves including collectible machines such as the Travelall and Scout. Author Patrick R. Foster is one of the world's premier transportation historians. His accessible writing style, illustrated with hundreds of never-before-seen archival photographs, makes this book the best examination of one of the world's most prolific truck manufacturers.

Built to Love reveals how companies can create captivating products that energize the marketplace and set the standard for what customers want and expect. Firms often hope the answer is to produce the latest high technology devices - only to find that they fail to light up the marketplace. Or firms rely on ads that overstate or mislead, leaving the customer disappointed and disillusioned. Instead, a deeper emotional engagement between the customer and product is required, regardless of whether the products are physical products, services, technologies, software, systems, or brands. Using a combination of industry - based research and laboratory experiments, the authors demonstrate that customers will richly pay for products that authentically provide emotional fulfillment. They uncover the science behind successful products that create an avid and loyal following, and they present evidence that product emotions increase a product's success in the marketplace as well as a firm's success in the stock market (even when the economy is down!). A practical how - to guide, the book next shows how to analyze customers' emotional needs and translate those needs into features that galvanize customers. Throughout, the book uses revealing case studies that show how to energize customers in both consumer and business - to - business worlds, in both large and small firms.
