As a long-term, innovative partner, Weidmüller stands for reliable high-quality products for surge protection. In-depth specialist knowledge and hundreds of tailor-made surge protection solutions make us your ideal partner.

Lightning and Surge Protection—Weidmüller

Weidmüller surge protection products guard network components against transients, surges, and spikes that are often introduced into low voltage systems. The need to protect all susceptible low-voltage routes like cable, telephone/data lines from surges, spikes, and transients is often overlooked. The solutions provided by Weidmüller help to protect the low voltage lines to block transients from entering into your system.

Surge protection for data interfaces—Weidmüller

Our VPU I, II, and III surge protection devices effectively reduce the interference coupling that occurs with transient overvoltages, so that it remains well below the limits specified in EN 60664-3 (DIN VDE 0110-3). The entire system is exposed to fewer malfunctions. The arresters are coordinated by technical means. Your advantages

Surge protection in energy systems—Weidmüller

Surge protection for instrumentation and control loops Weidmüller's wide product range for the I&C sector offers products in a 2-piece, pluggable design and modular terminals tension clamp or screw connection. These products are suitable for both binary and analog signals.

Surge protection for instrumentation and control (I&C)

Surge protection for instrumentation and control (I&C) Weidmüller's broad product range of VARITECTOR SPC for the I&C sector offers products in a 2-piece, pluggable design and VARITECTOR SSC modular terminals for tension clamp or screw connection.

Lightning and Surge Protection—Weidmüller

A lightning strike discharges several hundred kilovolts of electricity. Costly repairs, downtimes and sustained revenue losses can result in the absence of lightning arresters. Reason enough to protect yourself against damage by using VARITECTOR lightning and surge protection devices from Weidmüller. With VARITECTOR we offer an extended family of surge arresters of various types for power distribution systems, electronic equipment as well as for measurement, control and regulating signals ...

Surge Protection—weidmuller.in

Surge protection for instrumentation and control (I&C) Weidmüller's broad product range of VARITECTOR SPC for the I&C sector offers products in a 2-piece, pluggable design and VARITECTOR SSC modular terminals for tension clamp or screw connection.

Lightning and Surge Protection—weidmuller.de

VARITECTOR PU ZPA for mounting on 40 mm busbars Product innovation. Class I+II SPDs with 7,5 kA and 12,5 kA for bus bar system. According to the specifications of DIN VDE 0100-443 and -534, surge protection is an obligatory component of every energy supply ! especially in building infrastructures.

Surge protection in energy systems—Weidmüller

Surge protection for instrumentation and control loops Weidmüller's wide product range for the I&C sector offers products in a 2-piece, pluggable design and modular terminals tension clamp or screw connection. These products are suitable for both binary and analogue signals.

Surge protection for instrumentation and control (I&C)

The current safety standard NFPA 79 (Edition 2018) defines the use of surge protection devices in machines with safety circuits. According to NFPA 79, surge protection products must ensure voltage limitation according to the insulation coordination. This requirement is met by devices of the VARITECTOR PU US series.
