I plotted our suns course through space to discover that our sun was born in the constellation Orion. After the planets were formed Earth was covered with a five-mile-thick coating of ice one billion years. We eventually drifted near the Sirius multiple star system and little Sirius B (1.5 solar masses) grabbed hold of our sun putting it in

Access Free Istar 2500

orbit around Sirius A. During the rein of the dinosaurs the atmospheric pressure was around 30 pounds per square inch. Now it is 14.5 pounds per square inch. Before our sun was captured by the Sirius system earth had an atmosphere of 750 pounds per square inch. Such an atmosphere extended 2,500 miles above the planet. There was no way sunlight could thaw out mile-deep ice over the oceans. It took the power of a white dwarf to get life started. Our sun does not have enough power to keep us out of the ice ages otherwise we wouldnt have them! Cosmological Ice Ages Solved: the greatest mysteries of all time! Where was our sun born? What took Earth out of a billion year ice age? What made all the coal, oil and limestone? How did Earth get a 20.8% oxygen atmosphere? Where did the energy come from to make all the coal, oil and limestone? Who, what, when and why was the moon brought into

Access Free Istar 2500

orbit around Earth? By Henry Kroll 384 pages 8.5 by 11; quality trade paperback (soft cover); Catalog #08-0164; ISBN 1-4251-7062-5; US\$31.35, C\$31.35, EUR21.42, 16.19 About the Book I plotted our suns course through space to discover that our sun was born in the constellation Orion. After the planets were formed Earth was covered with a five-mile-thick coating of ice one billion years with an atmospheric pressure of over 750-pounds per square inch. Sunlight could not penetrate such an atmosphere extending 2,500-miles above the planet. We eventually drifted near the Sirius multiple star-system. Little Sirius B (1.5 solar masses) grabbed hold of our sun putting it in orbit around Sirius A. Earth has lost 98% of its atmosphere (AKA radiation shield). Our sun does not have enough power to keep us out of the ice ages. The additional light and heat from Sirius star system that melted the ice

Access Free Istar 2500

caps and got life started in the oceans. Over time the 750 PSI carbon dioxide atmosphere was laid down as coal, oil and limestone using photosynthesis and light from Sirius A and B. Dinosaurs couldn't live in today's atmosphere because their lungs were too small.

65-million years ago the atmosphere was 30 to 60 PSI. Earth has lost 98% of its atmosphere. It is now 14.5 pounds per square inch.

Ishtar is the first book dedicated to providing an accessible analysis

Access Free Istar 2500

of the mythology and image of this complex goddess. The polarity of her nature is reflected in her role as goddess of sexual love and war, and has made her difficult to characterise in modern scholarship. By exploring this complexity, Ishtar offers insight into Mesopotamian culture and thought, and elucidates a goddess who transcended the limits of gender, divinity and nature. It gives an accessible introduction to the Near Eastern pantheon, while also opening a pathway for comparison with the later Near Eastern and Mediterranean deities who followed her.

Cosa succedrebbe se si scoprisse che la storia dell'evoluzione del mondo non è quella che da sempre ci è stata tramandata? Che l'uomo è stato creato da una civiltà molto avanzata di extraterrestri? Mescolando miti, leggende e informazioni storiche di ieri e di oggi,

Access Free Istar 2500

insieme a riflessioni personali e citazioni di esperti, Aurelio Failla riscrive la storia del genere umano con una prospettiva visionaria e scioccante, che ha lo scopo di risvegliare le menti più pigre illuminandole con le sue risposte alle domande che ognuno prima o poi si pone riguardo all'origine della vita. Per guardare avanti, al futuro, l'autore sente di dover andare indietro, partendo dalla prima civiltà sumera e collegandola a quella arcadica, egizia, greca e, infine, romana, in un cerchio ideale che comprende la creazione, l'evoluzione, la decadenza e la rievolutione della storia teologica, politica e sociale dell'Italia e del mondo intero. “Non starò a raccontare la Storia che hanno scritto gli altri, bensì tutto quello che non è stato scritto! O meglio, ancora per essere più preciso, quello che succedeva dentro le varie storie evolutive o decadenti, dipendendo dai periodi. Meditate gente”. Aurelio Failla è nato a

Access Free Istar 2500

Sortino, un paesino di collina alle spalle di Siracusa, nel 1952. A diciotto anni è emigrato in Germania, dopo dodici anni è rientrato in Italia trasferendosi a Venezia, finché, una volta in pensione, è tornato al suo paese di nascita, in cui vive tuttora con sua moglie Svetlana.
