Aimed at academic library practitioners, this book describes how e-reserve services can evolve and adapt to the changing virtual learning environment of higher education. New approaches discussed include: the integration of subscribed, free, and copyrighted resources within course management systems; innovative employment of open URL link resolvers to connect e-reserve with library e-resources and services; video streaming within course documents; and the creative use of bibliographic software to produce customized reading lists. New Approaches to E-Reserve includes detailed descriptions and extensive step-by-step illustrations in order to provide readers with the tools needed to implement the techniques covered within. These combine to offer practical insight into common issues faced by academic institutions worldwide. In addition to an overview of practices and an update on new developments in e-reserve, a discussion of strategy, policy and organizational change extends this book's relevance to a much broader theme: the strategic management of current and future technological changes in tertiary education. Provides practical "how to advice, with appropriate illustrations Offers realistic suggestions for strategic moves to integrate services, respond to user needs, and collaborate with potential stakeholders within and outside the institution The authors possess wide-ranging skills in audio, visual and information services in academic libraries, administrative experience with organization change and up-to-date knowledge of technologies relevant to the academic library

Primary and Secondary education is a formative time for young students. Lessons learned before the rigors of higher education help to inform learners' future successes, and the increasing prevalence of learning tools and technologies can both help and hinder students in their endeavors. *K-12 Education: Concepts, Methodologies, Tools, and Applications* investigates the latest advances in online and mobile learning, as well as pedagogies and ontologies influenced by current developments in information and communication technologies, enabling teachers, students, and administrators to make the most of their educational experience. This multivolume work presents all stakeholders in K-12 education with the tools necessary to facilitate the next generation of student-teacher interaction.

Imagine if a student spent as much time managing information as celebrities doted on dieting? While eating too much food may be the basis of a moral panic about obesity, excessive information is rarely discussed as a crisis of a similar scale. Obviously, plentiful and high quality food is not a problem if eating is balanced with exercise. But without the skills of media and information literacy, students and citizens wade through low quality online information that fills their day yet does not enable intellectual challenge, imagination and questioning. *Digital Dieting: From Information Obesity to Intellectual Fitness* probes the social, political and academic difficulties in managing large quantities of low quality information. But this book does not diagnose a crisis. Instead, *Digital Dieting* provides strategies to develop intellectual fitness that sorts the important from the irrelevant and the remarkable from the banal. In April 2010, and for the first time, Facebook received more independent visitors than Google. Increasingly there is a desire to share rather than search. But what is the impact of such a change on higher education? If students complain that the reading is 'too hard', then one response is to make it easier. If students complain that assignments are too difficult, then one way to manage this challenge is to make the assignments simpler. Both are passive responses that damage the calibre of education and universities in the long term. *Digital Dieting: From Information Obesity to Intellectual Fitness* provides active, conscious, careful and applicable strategies to move students and citizens from searching to researching, sharing to thinking, and shopping to reading.
