Prepare a copy of your learning area ' s original K-12 Curriculum Guide and corresponding list of MELCs. Go to the sections of the curriculum guide and MELCs that are relevant to your instructional needs. Copy and accomplish the following table and compare the two documents to determine which learning competencies were retained, dropped, or merged.

Science, engineering, and technology permeate nearly every facet of modern life and hold the key to solving many of humanity's most pressing current and future challenges. The United States' position in the global economy is declining, in part because U.S. workers lack fundamental knowledge in these fields. To address the critical issues of U.S. competitiveness and to better prepare the workforce, A Framework for K-12 Science Education proposes a new approach to K-12 science education that will capture students' interest and provide them with the necessary foundational knowledge in the field. A Framework for K-12 Science Education outlines a broad set of expectations for students in science and engineering in grades K-12. These expectations will inform the development of new standards for K-12 science education and, subsequently, revisions to curriculum, instruction, assessment, and professional development for educators. This book identifies three dimensions that convey the core ideas and practices around which science and engineering education in these grades should be built. These three dimensions are: crosscutting concepts that unify the study of science through their common application across science and engineering; scientific and engineering practices; and disciplinary core ideas in the physical sciences, life sciences, and earth and space sciences and for engineering, technology, and the applications of science. The overarching goal is for all high school graduates to have sufficient knowledge of science and engineering to engage in public discussions on science-related issues, be careful consumers of scientific and technical information, and enter the careers of their choice. A Framework for K-12 Science Education is the first step in a process that can inform state-level decisions and achieve a research-grounded basis for improving science instruction and learning across the country. The book will guide standards developers, teachers, curriculum designers, assessment developers, state and district science administrators, and educators who teach science in informal environments.

Intended to help students from language-minority backgrounds develop literacy in English, this book identifies and answers the major questions surrounding reading instruction for English as a second language (ESL) students. Specifically, the book reviews and synthesizes what is known about background issues related to the education of ESL students; provides specific suggestions to teachers and administrators for organizing for instruction and enhancing student learning; and gives concrete examples of practical ways in which teachers can develop and implement authentic, meaning-centered instructional activities. Chapters in the book are (1) "Demographic Overview: Changes in Student Enrollment in American Schools" (Julia Lara); (2) "Multiculturalism: An Educational Model for a Culturally and Linguistically Diverse Society" (Carlos E. Cortes); (3) "The Acquisition of English as a Second Language" (Jim Cummins); (4) "Self-Esteem: Access to Literacy in Multicultural and Multilingual Classrooms" (Bess Altwerger and Bonnie Lee Ivener); (5) "Instructional Approaches and Teaching Procedures" (Anna Uhl Chamot and J. Michael O'Malley); (6) "Selecting Materials for the Reading Instruction of ESL Children" (Virginia Garibaldi Allen); (7) "Comprehending through Reading and Writing: Six Research-Based Instructional Strategies" (Nancy Farnan and others); (8) "Language, Literacy, and Content Instruction: Strategies for Teachers" (Alfredo Schifini); and (9) "Assessing the Literacy Development of Second-Language Students: A Focus on Authentic Assessment" (Georgia Earnest Garcia). "The ESL Student: Reflections on the Present, Concerns for the Future (Eleanor Wall Thonis) concludes the book. Author and subject indexes are attached. (RS)
