STEM project-based instruction is a pedagogical approach that is gaining popularity across the USA. However, there are very few teacher education programs that focus specifically on preparing graduates to teach in project-based environments. This book is focused on the UTeach program, a STEM teacher education model that is being implemented across the USA in 46 universities. Originally focused only on mathematics and science, many UTeach programs are now offering engineering and computer science licensure programs as well. This book provides a forum to disseminate how different institutions have implemented the UTeach model in their local context. Topics discussed will include sustainability features of the model, and how program assessment, innovative instructional programming, classroom research and effectiveness research have contributed to its success. The objectives of the book are:

- To help educators gain insight into a teacher education organizational model focused on STEM and how and why it was developed
- To present the theoretical underpinnings of a STEM education model, i.e. deep learning, conceptual understanding
- To present innovative instructional programming in teacher education, i.e. projectbased instruction, functions and

modeling, research methods • To present research and practice in classroom and field implementation and future research recommendations • To disseminate program assessments and improvement efforts

According to the Every Student Succeeds Act (ESSA), evidence-based practices are supported by rigorous research designs and demonstrate that they improve student outcomes, but the actual implementation of these practices in schools is limited. This essential guidebook assists coordinators of gifted education in implementing three evidence-based practices: universal screening, grouping, and acceleration. Each module includes an overview of research, administrative and assessment considerations, forms for implementing the practice, scripted presentation slides for educators and parents, and resources. Modules may be used by educators within a series of workshops for an entire school district, on an individual campus or for important stakeholders.
