For the standard C90, the C90A flight manual performance data was used. Up to about 14,000 feet at ISA, the PT6A-21 delivers its full take-off torque. At recommended cruise this is 1,315 ft/lbs per engine. Above this altitude, the engine loses torque and at 26,000 feet produces only 862 ft/lbs torque.

Financial analysis - Banyan Air Service

The Beechcraft King Air family is part of a line of American utility aircraft produced by Beechcraft. The King Air line comprises a number of twin-turboprop models that have been divided into two families. The Model 90 and 100 series developed in the 1960s are known as King Airs, while the later T-tail Model 200 and 300 series were originally marketed as Super King Airs, with the name "Super ...

A treasury of thirty-seven years of flying and teaching experience in the world's most popular executive aircraft. Tom Clements' articles, stories, and operating tips all compiled into one reference book. This information will be invaluable for current or future pilots of King Air airplanes.

Explains air traffic control terms, describes the three phases of an IFR flight, and offers advice on improving radio communications skills

Extensive animation and clear narration highlight this first-of-its-kind CD-ROM. It shows all major systems of jet and turboprop aircraft and how they work. Ideal for self-instruction, classroom instruction or just the curious at heart.
