This book presents a collection of interrelated research advances in the field of technological entrepreneurship from the perspective of competition in emerging markets. Featuring contributions by scholars from different fields of interest, it provides a mix of theoretical developments, insights and research methods used to uncover the unexplored aspects of competitiveness in emerging markets in an age characterized by disruptive technologies.

50% OFF! Holiday Season Special Price! The first ever English language biography of Masayoshi Son, Japan's foremost IT revolutionary and SoftBank's founder, chairman and CEO. Based on over twenty years of in-depth interviews and study, Atsuo Inoue brings Son's story to life in this translation of the Japanese best seller. From his humble beginnings as a son of Korean immigrants living in a shack in southwest Japan, to his aim to become No. 1 in the world as CEO of one of Japan's largest Internet companies, Inoue richly details Son's inspiring journey and the challenges he faced along the way. Told from the viewpoint of those who know him best—relatives, friends and business partners from around the world—the story reveals the truth about "rising Son," the man who made "Information Revolution – Happiness for Everyone" his life's mission. Son was born in 1957 as a third generation Korean resident in Japan's Saga Prefecture. He entered one of the Prefecture's most prestigious high schools, attending for just the first semester before dropping out to venture to the US. He was only 16 years old. In the US, he acquired high school graduate equivalency in just three weeks through accelerated study and then entered the University of California, Berkeley. As a college student, he earned his first million dollars for the invention of an automatic voice translator. Then he came back to Japan to found SoftBank. Continuously realizing his aspirations, he made SoftBank into a multibillion dollar enterprise. He attributes his success to making decisions with extraordinary speed and by leveraging his friendships with innovators, including his close friend Steve Jobs. "I will create a self-sustaining enterprise that lasts over 300 years." Such bold statements have garnered Son attention from all over the world. But who is the real Masayoshi Son? The author Atsuo Inoue has covered Son's career closely as a journalist and his insightful observations vividly paints an intimate portrait of the charismatic business revolutionary, who blends cool rational thought with fiery passion and genius. "I've never seen such a comprehensive account of my life." —Masayoshi Son, Chairman & CEO of SoftBank Corp.

A global exploration of coal geology, from production and use to chemical properties and coal petrology Coal Geology, 3rd Edition, offers a revised and updated edition of this popular book which provides a comprehensive overview of the field of coal geology including coal geophysics, hydrogeology and mining. Also covered in this volume are fully revised coverage of resource and reserve definitions, equipment and recording techniques together with the use of coal as an alternative energy source as well as environmental implications. This third edition provides a textbook ideally suited to anyone studying, researching or working in the field of coal geology, geotechnical engineering and environmental science. Fills the gap between academic aspects of coal geology and the practical role of geology in the coal industry Examines sedimentological and stratigraphical geology, together with mining, geophysics, hydrogeology, environmental issues and coal marketing Defines global coal resource classifications and methods of calculation Addresses the alternative uses of coal as a source of energy Covers a global approach to coal producers and consumers

Hydrogen Fuel Cells for Road Vehicles addresses the main issues related to the application of hydrogen fuel cell technology in the road transportation sector. A preliminary treatment is given on fuel resources and atmospheric pollution concerns which are closely related to the current technology (internal combustion engine) used for moving people and goods. The authors deal, in particular, with the problems that can hinder a widespread hydrogen market (production, storage and distribution), as well as giving an analysis of fuel cell technologies available for utilization of this energy carrier in the automotive field. Hydrogen Fuel Cells for Road Vehicles also examines the concerns faced during the design and realization of a PEM fuel cell system with optimal size and efficiency, evidencing the impact of the individual auxiliary components on energy losses and dynamic stack performance. The book ends with the analysis of two practical case studies on fuel cell propulsion systems. Hydrogen Fuel Cells for Road Vehicles is a useful text for researchers, professionals and advanced students in the fields of automotive and environmental engineering.

In Yellow Steel, the first overarching history of the earthmoving equipment industry, William Haycraft examines the tremendous increase in the scope of mining and construction projects, from the Suez Canal through the interstate highway system, made possible by innovations in earthmoving machinery. Led by Cyrus McCormick's invention in 1831 of a practical mechanical reaper, many of the builders of today's massive earthmoving machines began as makers of reapers, plows, threshers, and combines. Haycraft traces the efforts of manufacturers such as Caterpillar, Allis-Chalmers, International Harvester, J. I. Case, Deere, and Massey-Ferguson to diversify from farm equipment to specialized earthmoving equipment and the important contributions of LeTourneau, Euclid, and others in meeting the needs of the construction and mining industries. He shows how postwar economic and political events, especially the creation of the interstate highway system, spurred the development of more powerful and more agile machines. He also relates the precipitous fall of several major American earthmoving machine companies and the rise of Japanese competitors in the early 1980s. Extensively illustrated and packed with detailed information on both manufacturers and machines, Yellow Steel knits together the diverse stories of the many companies that created the earthmoving equipment industry—how they began, expanded, retooled, merged, succeeded, and sometimes failed. Their history, a step-by-step linking of need and invention, provides the foundation for virtually all modern transportation, construction, commerce, and industry.

Provides updated, comprehensive, and practical information and guidelines on aspects of building design and construction, including materials, methods, structural types, components, and costs, and management techniques.

'Superior' crime fiction set in Iceland' The Times 'As chilling as an Icelandic winter' S. J. Bolton When a shipowner is found dead, tied to a bed in one of Reykjavik's smartest hotels, Sergeant Gunnhildur sees no evidence of foul play. However, she still suspects things are not as cut and dried as they seem and, as she investigates the shipowner's untimely demise, she stumbles across a discreet bondage society whose members are being systematically exploited and blackmailed. But how does all this connect to a local gangster recently returned to Iceland after many years abroad, and the unfortunate loss of a government laptop containing sensitive data about various members of the ruling party? What begins as a straightforward case for Gunnhildur soon explodes into a dangerous investigation, uncovering secrets that ruthless men are ready to go to violent extremes to keep. The third dark and atmospheric thriller in Quentin Bates's Icelandic crime series. A chilling page-turner perfect for fans of Jo Nesbo, Henning Mankell and Soren Sveistrup's The Chestnut Man. Praise for Quentin Bates: 'A great read - leaves you craving the next installment' Yrsa Sigurðardóttir 'A perfect book to curl up with in front of the fire' The Bookbag 'Well written and absorbing' Woman's Way 'Captures the chilly spirit of Nordic crime fiction. . . . Fans of Arnaldur Indridason's Reykjavik mysteries will want to add Bates to their reading lists' Booklist [A] crackling fiction debut ... palpable authenticity' Publishers Weekly 'A superb new series' Eurocrime
