If you leave your computer on all the time, you can often fix a problem by turning shutting down the computer, then unplugging it. Then holding down the power button for 30 seconds while the computer remains unplugged. This may cause the LED lights to flash. Plug the computer back in and power it on.

How to Repair a Computer (with Pictures) - wikiHow

If the fan doesn ' t spin but the the laptop makes noise, probably it ' s coming from the hard drive. Back up all personal data as soon as possible and replace the hard drive. Also, you can remove the hard drive and stat the laptop. If the laptop still makes noise, most likely it ' s bad fan. Problem 5.

Most common hardware problems | Laptop Repair 101

Fortunately, at least with desktop computers and some laptop and tablet computers, you can replace the non-working piece of hardware without having to replace or rebuild the computer from scratch. Here are some resources you should check out before you go out and purchase a new hard drive, replacement RAM sticks, or anything else you think may be going bad:

Cost guide: computer and laptop repairs | Which?

I took the BTEC course back in August 2005. I must say it was the best decision I made. After passing the BTEC qualification I setup my own PC and Laptop repair business www.ifixpc.co.uk and am amazed at how in demand the services I offer are. The grounding from the BTEC course has been invaluable, and if I do run into anything I'm not sure about, I phone the guys at Humberside for advice ...
