Twenty-five-year-old Jack Sparrow is a clean-cut merchant seaman pursuing a legitimate career as a first mate for the East India Trading Company. He sometimes thinks back to his boyhood pirating days, but he doesn't miss Teague's scrutiny or the constant threat of the noose. Besides, he doesn't have much choice—he broke the Code when he freed a friend who had been accused of rogue piracy, and he can no longer show his face in Shipwreck Cove. When Jack's ship is attacked by pirates and his captain dies in the altercation, he suddenly finds himself in command.

Bioelectrochemistry is a fast growing field at the interface between electrochemistry and other sciences such as biochemistry, analytical chemistry and medicinal chemistry. In the recent years, the methods and the understanding of the fundamentals have seen significant progress, which has led to rapid development in the field. Here, the expert editors have carefully selected contributions to best reflect the latest developments in this hot and rapidly growing interdisciplinary topic. The resulting excellent and timely overview of this multifaceted field covers recent methodological advances, as well as a range of new applications for analytical detection, drug screening, tumor therapy, and for energy conversion in biofuel cells. This book is a must-have for all Electrochemists, Biochemists, Analytical Chemists, and

Medicinal Chemists.

An essential reference for any laboratory working in the analytical fluorescence glucose sensing field. The increasing importance of these techniques is typified in one emerging area by developing non-invasive and continuous approaches for physiological glucose monitoring. This volume incorporates analytical fluorescence-based glucose sensing reviews, specialized enough to be attractive to professional researchers, yet appealing to a wider audience of scientists in related disciplines of fluorescence.

Offers a systematic approach to discipline management, describes practical schoolroom techniques, and tells how to set limits

This volume concludes the Army Series. It describes the Australian Army campaigns in the last months of 1944 and in 1945. It tells the full story of the fighting in Bougainville, New Britain, round Wewak, at Balikpapan and Tarakan and in British Borneo.

Fall in love all over again with a heartwarming reader-favorite from #1 New York Times bestselling author Susan Mallery!

DK is the world's leading illustrated reference publisher, producing beautifully designed books for adults and children in over 120 countries.

The devil will do everything he can to keep Christians from learning the truth found in the Word of God; he will fight us more on this, than anything else. He knows that once we learn the truth, his heyday is over. "You can steal stones from a pile, but try stealing one that has been concreted into a building" (Rick Joyner). This book "Equipped for Spiritual Warfare" helps all believers and disciples of Christ to become warriors for these end times and to know where they belong... "This is a new commission and direction I am giving unto you." Teaching you how to stand in His authority and dunamis power as an heir in Christ Jesus.

This book provides an overview of statistical chemometric methods used in the rapidly changing arena of drug discovery. It deals with physicochemical molecular descriptors, modern statistical methods to study structure-property and structure-activity relationships, including three-dimensional QSAR approaches and the concepts of molecular diversity. All scientists who investigate quantitative structure-activity relationships in medicinal, agricultural, or environmental chemistry will benefit from this book. Key Features * Presented in a theoretical as well as practical manner * Provides an excellent introduction and recent overview of the field * Addresses a rapidly changing area in a timely manner * Includes concise updates of * The use of chemical descriptors * Modern statistical approaches * Comprehensive reviews of the literature in 3D-QSAR * Concepts and applications of molecular similarity and diversity
