At once a deeply moving personal document and a groundbreaking work of scientific detection, Living Downstream will be a touchstone for generations, reminding us of the intimate connection between the health of our bodies and the integrity of our air, land, and water.

Living Downstream: An Ecologist's Personal Investigation...

Living Downstream: An Ecologist's Personal Investigation of Cancer and the Environment by Sandra Steingraber, combines science and the authors own story. I heard Ms. Steingraber talk about fracking during the 2012 Bioneers conference and found her a compelling speaker. I decided to look for her books and came across Living Downstream.

Sandra's highly acclaimed book, Living Downstream: An Ecologist's Personal Investigation of Cancer and the Environment presents cancer as a human rights issue. Originally published in 1997, it was the first to bring together data on toxic releases with data from U.S. cancer registries and won praise from international media including The Washington Post, Publishers Weekly, The Lancet, and The London Times.

Living Downstream+ About Sandra

Living Downstream a scientist's personal investigation of cancer and the environment by Sandra Steingraber. Ecological Roots p257 We know a lot about bladder cancer. Bladder carcinogens were 1 among the earliest human carcinogens ever identified, and one of the first human oncogenes ever decoded was isolated from some unlucky fellow's bladder tumor.
