Shaft sinking for underground transportation purposes is a very complex technological process in mining and geotechnology which requires specific and specially designed technological equipment. This technological process is dealt with for a long time, since mining is one of the oldest industries in the world. This book presents the te

The Ontario Round Table on Environment and Economy was established with members from government, business, the native community, industry, academia and environmental groups. This paper gives recommendations for greening Ontario's economy, improving decision-making, allowing citizens to take a full and active part in restructuring for sustainability, ensuring accountability, and dealing with global warming.
