the astounding result of those efforts, reconstructing, in words and images, the wild isla. On September 12, 1609, Henry Hudson first set eyes on the land that would become Manhattan. It's difficult for us to imagine what he saw, but for more than a decade, landscape ecologist Eric Sanderson has been working to do just that.

Yet Mannahatta is not a natural history of the island, but, rather, the story of piecing together one possible landscape model of the island before conquest. The book is full of glossy pictures and fantastic juxtapositions of New York today and Mannahatta of 1609, and will

In his new book Mannahatta:
A Natural History of New
York City, ecologist Eric W.
Sanderson of the Wildlife
Conservation Society
considers what Manhattan was
like a short 400 years ago,
before the first settlers
arrived. The design for the
book helps make this serious
scientific history
accessible and emphasizes
the startling contrast
between the metropolis of
today with the Manhattan
Island of 1609.

Mannahatta: A Natural History of New York City is the astounding result of those efforts, reconstructing in words and images the wild island that millions now call home. By geographically matching an 18th-century map with one of the modern city, examining volumes of historic documents, and collecting and analyzing scientific data, Sanderson re-creates the forests of Times Square, the meadows of Harlem, and the wetlands of downtown.
