A major compendium on the subject, in two parts. Part I (150 pages) has chapters on the various kinds of symptoms of poisoning, classification of poisons, symptoms and antidotes, and a catalog of the more important poisonous plants of the United States and Canada arranged in taxonomic order. Part II (over 700 pages) lists poisonous plants in taxonomic order with descriptions, illustrations, and account of poisonous properties. Also includes a catalog of the poisonous plants of the world in tabular form, with plants arranged alphabetically by family; gives name authority, properties, and locality. A bibliography of 1,097 items is followed by a general index.

The Trees and Shrubs manual is a reference manual on diseases which attack trees, shrubs, and vines. The manual identifies various types of diseases which are known to invade these plants located throughout North, Central, and South America. The recordings include diseases caused by fungi, bacteria, viruses, viroids, phytoplasmas, and nematodes. Causal disease agents are described and illustrated in some cases and diseases and disease control measures are also discussed. A manual such as this is never finished since new reports of diseases are continuously reported.

The Fruits and Vegetables manual is a reference manual on diseases which attack fruits (including berries), vegetables, and nuts. The manual identifies various types of diseases which are known to invade these plants located throughout North, Central, and South America. The recordings include diseases caused by fungi, bacteria, viruses, viroids, phytoplasmas, and nematodes. Causal disease agents are described and illustrated in some cases and diseases and disease control measures are also discussed. A manual such as this is never finished since new reports of diseases are continuously reported.
