Problem solving in Polya's view is about engaging with real problems; guessing, discovering, and making sense of mathematics. (Real problems don't have to be 'real world' applications, they can

The importance of problem-solving in learning mathematics comes from the belief that mathematics is primarily about reasoning, not memorization.

Problem-solving allows students to develop understanding and

It can also be a problem referring to the nature of mathematics itself, such as Russell's Paradox. The result of mathematical problem solved is demonstrated and examined formally.
