Please note this title is suitable for any student studying: Exam Board: AQA Level: GCSE Subject: Mathematics First teaching: September 2015 First exams: June 2017 AQA GCSE Maths, Higher Student Book has been approved by AQA and specially written by a team of maths experts for the Higher tier of AQA's 2015 GCSE specification. Designed to fully support the new style of assessment, the book adopts a clear style to focus on delivering exam success via the careful development of fluency and problem solving practice. Powered by MyMaths the book links directly to the ever popular web site offering students a further source of appropriate support.

Bridges the gap between global farmers and fishermen and American consumers America now imports twice as much food as it did a decade ago. What does this increased reliance on imported food mean for the people around the globe who produce our food? Kelsey Timmerman set out on a global quest to meet the farmers and fisherman who grow and catch our food, and also worked alongside them: loading lobster boats in Nicaragua, splitting cocoa beans with a machete in Ivory Coast, and hauling tomatoes in Ohio. Where Am I Eating? tells fascinating stories of the farmers and fishermen around the world who produce the food we eat, explaining what their lives are like and how our habits affect them. This book shows how what we eat affects the lives of the people who produce our food. Through compelling stories, explores the global food economy including workers rights, the global food crisis, fair trade, and immigration. Author Kelsey Timmerman has spoken at close to 100 schools around the globe about his first book, Where Am I Wearing: A Global Tour of the Countries, Factories, and People That Make Our Clothes He has been featured in the Financial Times and has discussed social issues on NPR's Talk of the Nation and Fox News Radio Where Am I Eating? does not argue for or against the globalization of food, but personalizes it by observing the hope and opportunity, and sometimes the lack thereof, which the global food economy gives to the world's poorest producers.

This book constitutes the refereed post-conference proceedings of the IFIP WG 9.7 International Workshop on the History of Computing, HC 2018, Held at the 24th IFIP World Computer Congress, WCC 2018, in Poznań, Poland, in September 2018. The 16 revised full papers were carefully reviewed and selected from 20 submissions. They reflect academic approaches to history along with the expertise of museum and other public history professionals as well as the experience of computing and information science practitioners. The papers are organized in the following sections: Eastern Europe, Poland, Soviet Union, CoCom and Comecon; analog computing, and public history.

This report strengthens the economic case for increased public investment and more robust policy attention to food safety in low and middle income countries and provides guidance on ways to achieve significant, broad-based impact from such actions.

This book constitutes the refereed proceedings of the 11th International Andrei P. Ershov Informatics Conference, PSI 2017, held in Moscow, Russia, in June 2017. The 31 full papers presented in this volume were carefully reviewed and selected from 57 submissions. The papers cover various topics related to the foundations of program and system development and analysis, programming methodology and software engineering and information technologies.
