1982 Mercedes-Benz 190 (W201) 2.0 i (122 Hp) | Technical ...

This four cylinders engine was built entirely from scratch. It had new cast iron cylinder block, aluminum 8-valve cylinder head with one camshaft. Late engines (until 1984) didn't have hydraulic tappets/lifters. The diameter of intake valves is 43 mm and exhaust valve - 39 mm. The 2.0l M102 from the beginning had the single-strand chain which was very unreliable, but from 1987 this chain was replaced by a double-row chain, and it operates very well.

Mercedes 190e engine for sale - October 2020

The Mercedes 190E is built with a 16-valve engine, which allows it to easily pull in air and push out exhaust. In other words, it breathes more easily at high speeds. This type of engine was used to earn second place during the DTM, and after even more improvements, Mercedes made it available for the streets.
