A. Access 2013 is making a renewed attempt to bring its databases to the Web with a new feature called Web Apps. The basic idea is that you, the Access developer, create a database using the familiar Access tools and place it on a SharePoint server.

### ~~Access 2013: The Missing Manual (Missing Manuals ...~~

When you open a database, the ribbon appears at the top of the main Access window, where it displays the commands in the active command tab. The ribbon contains a series of command tabs that contain commands. In Access, the main command tabs are File, Home, Create, External Data, and Database Tools. Each tab contains groups of related commands, and these groups surface some of the additional new UI elements, such as the gallery, which is a new type of control that presents choices visually.

Like relational databases, Microsoft Access also allows you to link related information easily. For example, customer and order data. However, Access 2013 also complements other database products because it has several powerful connectivity features. It can also import or link directly to data stored in other applications and databases.
