Minolta Spotmeter - YouTube

I have been using Minolta Spotmeter F for years. While the spotmeter worked great and consistently, I was eyeing the Pentax spotmeter due to its dial exposure calculator. With Minolta, I had to push too many buttons to get the required shutter speed. Minolta only works in time priority mode and I use aperture priority for B&W landscapes. Well, I finally got the Pentax digital spotmeter and ...

This book consists of edited conversations between DP's, Gaffer's, their crew and equipment suppliers. In common with the other CML books it doesn't have the same structure as a "normal" film reference book. The discussions have occasionally been edited for clarity and brevity. They will sometimes ramble a little but that's the nature of a conversation and some interesting information comes out in the process! All views expressed are those of the posters, please join CML and take it up with them if you have a problem! This book covers Lighting discussions during the period January 2001 to January 2005.

Every working or aspiring camera assistant needs this book! Now covers HD!
