The Mitsubishi Lancer Evo IX marked the gradual winding down of the Evo cult in the UK. Faster and more capable than any Lancer Evo model to date, it was a car whose time had come and gone, the big Evo sales having come with the VIII. By 2005, many punters recognised that the Evo was now an old car and were increasingly moving onto new things. That and the rise of so-called 'chav culture' banged nails into the Evo's coffin from which it could only recover with the radically different Evo X.

For quite a few buyers, the big story regarding the March 2003 launch of the Mitsubishi Lancer Evo VIII was the fact that it was the very first Evo model to have full UK factory approval. Prior to the VIII, Evos were imported on a bit of a nudge and a wink basis through third parties such as Ralliart and weren't covered by Mitsubishi's normal warranty and servicing deals.

The definitive international history of one of the world's most successful rally cars. Covers every Lancer model - including all special editions, and Dodge, Colt, Plymouth, Valiant, Eagle, Proton and Hyundai variants - from 1973 to date. Includes a Foreword by Shinichi Kurihara, Mitsubishi's Evo team leader.

First released in 2007, the bestselling Transport Revolutions argued that land transport in the first half of the 21st century will feature at least two revolutions. One will involve the use of electric drives rather than internal combustion engines. Another will involve powering many of these drives directly from the electric grid - as trains and trolley buses are powered today - rather than from on-board fuel. Now available for the first time in paperback and updated with the most recent data, it sets out the challenges to our growing dependence on transport fuelled by low-priced oil. These challenges include an early peak in world oil production and profound climate change resulting in part from oil use. It proposes responses to ensure effective, secure movement of people and goods in ways that make the best use of renewable sources of energy while minimizing environmental impacts. Synthesizing engineering, economics, environment, organization, policy and technology in a detailed yet highly readable style, Transport Revolutions is essential reading for anyone working, studying or interested in transport and the environment.

This e-book details the most interesting and important characteristics of the automobiles, car maintenance, styling features, car body style, the standard classification of the cars, an history of the automobiles, introduction in the automotive industry, and the traffic code, rules and signs. An automobile, usually called a car (an old word for carriage) or a truck, is a wheeled vehicle that carries its own engine. Older terms include horseless carriage and motor car, with "motor" referring to what is now usually called the engine. It has seats for the driver and, almost without exception, for at least one passenger. The automobile was hailed as an environmental improvement over horses when it was first introduced. Before its introduction, in New York City, over 10,000 tons of manure had to be removed from the streets daily. However, in 2006 the automobile is one of the primary sources of worldwide air pollution and cause of substantial noise and health effects.

Perceived as a replacement for the long running Leone, the Impreza quickly gained a great reputation through Subaru's successful WRC program. This book covers the full story of the Impreza, from concept through to the current production car, looking at the rally machines along the way, and illustrated throughout with contemporary material. Now with over 400 mainly color pictures and significant additional text, this is a fantastic warts and all account of an amazing car.

Presents the latest safety ratings, dealer prices, fuel economy, insurance premiums, maintenance costs, and tires of new model automobiles.

Ken Genie knows tragedy. His dad passed away and his brother ditched town. Ken also knows cars. He studies them, obsessively. But his mother is afraid to lose another son, and she won't let Ken get behind the wheel. Local millionaire Edmond Tremonte has a grudge against the Genie family. And he plans to take it out on their entire Alaska town. When Tremonte loses his business and then his mind, he builds a mechanical beast designed for maximum damage. And despite the wishes of Ken's mom, Ken and his Mitsubishi might be the only things that can stop Tremonte's reign of terror. Includes real tech specs and tuning details for the Mitsubishi Eclipse!
