The A instruction in step 4 applies to the result of steps 5 and 6. The program instruction list is thus: More Than One Rung. Figure shows a ladder, in Mitsubishi notation, with two rungs. In writing the instruction list we just write the instructions for each line in turn. The instruction LD or LDI indicates to the PLC that a new rung is starting. The instruction list is thus: LD X400 OUT Y430 LDI X400 OUT

5. PLC Software (read). To read some frame through PLC RS485 port, for example the Frequency Output. We're going to use the instruction MODRD (API 100) and again the special mark M1122 to trigger the communication. But this time, we will use the special registers D1050 to D1055, where we could found the data received.
