4-H is a community of young people, across America, learning leadership, citizenship, and life skills....and along with the Colorado State University Community.

Tip Sheets - Colorado State University

Welcome to the National Association of Rocketry. The NAR is all about having fun and learning more with and about sport rockets. We are the oldest and largest sport rocketry organization in the world. Since 1957, over 100,000 serious sport rocket modelers have joined the NAR to take advantage of the fun and excitement of organized rocketry.

National Association of Rocketry

Model rockets offer much adventure for you. These models actually fly at more than 300 miles an hour, and they may soar up to 2,000 feet in the air. And they are inexpen sive, fun to build, and exciting to launch. More than that, model rockets can launch you toward an exciting, space-age career. Many model rocketeers become scientists,

The Classic Guide by the "Father of Model Rocketry" Now Completely Revised and up to Date.. This new edition of the model rocketeer's "bible" shows you how to safely build, launch, track, and recover model rockets-and have fun doing it. Whether you're a beginner or a veteran model rocketeer, the Handbook of Model Rocketry, the official manual of the National Association of Rocketry (NAR), will become your well-used reference book. G. Harry Stine has been a model rocketeer since 1957 when he founded the NAR and started the first model rocket company. Stine's Handbook, after satisfying rocket enthusiasts for nearly three decades, remains the definitive resource. Recent technological progress has had a major effect on the model rocket hobby and sport. This revised and updated edition covers such new technology as: revised computer programs that use improved versions of Basic composite propellant model rocket motors recently approved reloadable model rocket motors building and flying large model rockets radio-controlled boost gliders and rocket gliders solid-state, microchip, computer-readable modules used to measure temperature, pressure, acceleration, and airspeed

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.
