### ~~Neurocase The Cambridge Semantic Memory Test Battery~~

Abstract We document the unexpected dissociation of preserved reading skills in a patient with severely impaired semantic memory. The common co-occurrence between impairment of word meaning and surface dyslexia has not been observed. The patient (hereafter called DRN) had marked naming and word comprehension difficulties.

From Cambridge English Corpus. Semantic memory is apparently separated from the spatio-temporal causality of events occurring in our daily experience. From Cambridge English Corpus. Specifically, it seems possible that children do not encode in lexical or semantic memory words spoken by ignorant speakers.
