The D5100 is a smaller and (we think) more attractive camera than its predecessor the D5000. It is less bulbous, and closer to the D3100 and D7000 in terms of styling. The most significant design difference is the addition of a side-hinging LCD screen in the D5100, as opposed to the bulkier (and more awkward) bottom-hinged LCD used in the D5000.
