Hispanic students in an English-speaking classroom. Two consecutive years of failing to meet anticipated yearly growth among Hispanic students in Algebra I, as determined by the North Carolina End of Course exams, had highlighted the situation which this research was designed to improve. The writer developed a controlled experiment which was implemented in Algebra classes in a North Carolina high school. (a) The control group used Microsoft PowerPoint slides created for every lesson plan determined by the school system's pacing guide over the one-semester course, based on the adopted Algebra I textbook (Prentice-Hall, 2004), with supplemental worksheets from the same publisher's accompanying study guide and workbook. (b) The treatment group used the same PowerPoint slides as the control group,

with the addition of Spanish subtitles for key words and concepts presented during the lesson introduction. The subtitles were a smaller font and in a different color. Upon completion of the instruction, Hispanic students were allowed to form monolingual working groups to delve into application. Their worksheets came from the same source but were in Spanish. (c) The researcher examined differences in cognitive domain of both groups using analysis of variance (ANOVA) in pre-test and post-test data from the software NovaNet, as well as data from county-wide semester-final exams. Changes in attitudes regarding mathematics as determined by a student questionnaire were compared with frequency distribution on answers to test questions. Changes in classroom climate were assessed using the Classroom

of the digital transformation on knowledge work and knowledge management. It also addresses three new topics: the impact of knowledge management practices on performance; knowledge management in the public sector; and an introduction to ISO 9001:2015 as an implementation framework. The book is intended not only for academic education but also as an essential guide for managers, consultants, trainers, coaches, and all those engaged in business, public administration or non-profit work who are interested in learning about organizations in a knowledge economy. Given its wealth of case studies, examples, questions, exercises and easy-to-use knowledge management tools, it offers a true compendium for learning about and implementing knowledge management initiatives.

Precalculus is adaptable and designed to fit the needs of a variety of precalculus courses. It is a comprehensive text that covers more ground than a typical one- or two-semester college-level precalculus course. The content is organized by clearly-defined learning objectives, and includes worked examples that demonstrate problem-solving approaches in an accessible way. Coverage and Scope Precalculus contains twelve chapters, roughly divided into three groups. Chapters 1-4 discuss various types of functions, providing a foundation for the remainder of the course. Chapter 1: Functions Chapter 2: Linear Functions Chapter 3: Polynomial and Rational

Functions Chapter 4: Exponential and Logarithmic Functions Chapters 5-8 focus on Trigonometry. In Precalculus, we approach trigonometry by first introducing angles and the unit circle, as opposed to the right triangle approach more commonly used in College Algebra and Trigonometry courses. Chapter 5: Trigonometric Functions Chapter 6: Periodic Functions Chapter 7: Trigonometric Identities and Equations Chapter 8: Further Applications of Trigonometry Chapters 9-12 present some advanced Precalculus topics that build on topics introduced in chapters 1-8. Most Precalculus syllabi include some of the topics in these chapters, but few include all. Instructors can select material as needed from this group of chapters, since they are not cumulative. A memoir of Cassie's life leading up to, and during her Expedition around the world. At age twenty-seven, Cassie De Pecol accomplished something remarkable. She became the first woman on record to travel to every country on Earth, and did it faster than anyone in history, male or female. She was inspired by her experiences on the Discovery Channel's Naked and Afraid both the three weeks she spent in the Panamanian wilderness and the cyberbullying she endured after the show. And it opened her eyes to the need for women to make a difference in the world. In Expedition 196, Cassie
