Oxford International Primary Geography is a complete six year primary geography course that provides an engaging introduction to the subject. Using real life examples from around the globe, the course covers key aspects of both human and physical geography, from the basics of mapping to more complex topics such as the pros and cons of ecotourism and how to meet the resource needs of the world's growing population. Additional Workbooks provide students with the opportunity for further study in the classroom or at home, including suggested research topics and cross-curricular projects. For the teacher, the Teacher's Guide provides step-by-step guidance for each lesson, as well as background knowledge and geographical information for specialist and non-specialist teachers alike.

Walking a forest trail in Costa Rica, a visitor might be struck by the sight of an iridescent blue morpho butterfly fluttering ahead in the filtered daylight, or an enormous silk moth, as magnificently patterned and subtly colored as a Persian carpet, only emerging to fly at night. Elsewhere, vivid yellow and orange sulphur butterflies flock to puddles to sip the concentrated minerals. Such is the dazzling variety of the butterflies and moths unique to this region. Gathered by biologists Daniel Janzen and Winifred Hallwachs in the forests of northwestern Costa Rica, 100 tropical butterflies and moths represent the diversity in large-format photographs by Jeffrey Miller that document the dizzying variety of shapes, colors, and markings. The photographs are accompanied by species accounts and images of the corresponding caterpillar. The authors recount these insects' feats of mimicry and migration, lift the veil on their courtship, and show how the new technology of DNA barcoding is changing the picture of Lepidopteran biodiversity. The authors also tell the success story of Area de Conservacion Guanacaste, where the long-term work of Janzen and Hallwachs, a team of caterpillar collectors, and the participation of neighboring farming communities has deepened understanding of Costa Rica's Lepidoptera and has brought about advances in restoration ecology of tropical habitats, biodiversity prospecting, biotechnology, and ecotourism development.

Investing Against the Tidelis an authoritative guide for investment professionals, offering them a rare insight into what it really takes to run money in a top-performing fund, as well as providing amateur investors the chance to learn the stock-picking strategies from a leading money-manager. About the author Anthony Bolton left Cambridge University with a degree in engineering to begin a career in the City. He started as a graduate trainee working for Keyser Ullmann in 1971 before taking up a full time position as an assistant in their investment department. In 1976 he moved to Schlesingers where he became, for the first time, an investment manager. In 1979, aged 29, he was recruited by Fidelity, the international fund management group, as one of its first London-based investment managers, a move that proved to be the launch of a long and successful career. In surveys of professional investors, he is regularly voted the fund manager most respected by his peers. He retired from full-time investment management at the end of 2007, but continues to work at Fidelity as a mentor of the analysts and younger fund managers as well as being involved in overseeing Fidelity 's investment process. His hobby is composing classical music. Anthony Bolton is married with three children and lives in West Sussex.

Researching Human Geography is an essential new text for any geography student about to embark on a research project. An understanding of how different theories of knowledge have influenced research methodologies is crucial in planning and designing effective research; this book makes this link clear and explores how various philosophical positions, from positivism to post-structuralism, have become associated with particular methodologies. The book gives an overview of a wide range of methods and data collection, both quantitative and qualitative, and explores their strengths and weaknesses for different kinds of research. 'Researching Human Geography' also looks at the various techniques available for the analysis of data, which is presented as an integral and ongoing part of the research process. Clearly written, with extensive use of examples from previous research to show 'methodology in action', this new text is an invaluable addition to both the theory and method of research in human geography.
