The first of the Great Observatories was deployed from the Space Shuttle Discovery into Earth orbit in April 1990. It is the product of two decades of research and development by 10,000 scientists and engineers at various NASA centers, private companies, universities, and the European Space Agency. The purpose of Hubble is to study the cosmos from low-Earth orbit.

Nasa Space Shuttle Atlantis : 4 Steps - Instructables

Needed: Space Shuttle Glider, paper clips, nylon fishing line, cellophane tape, and book What To Do: Spread open two paper clips so that they become "S" hooks. Straighten out the lower end of the S for each hook and attach these straightened ends to the back of the glider with tape. One clip should be in the nose and the other in the tail. Tie one end of the fishing line around the book and ...

Space Shuttle Glider pdf - NASA

Technically the name "Space Shuttle" solely applies to the Space Shuttle Program (STS) of the USA. Including the Buran Project leads to the question what else may qualify as a "Space Shuttle". Changing the template to "Space Planes" may be appropriate. This would lead to admitting other craft into this template. I created a proposal template (shown on the right) that includes craft that may ...

Template:Space suits - Wikipedia

Cardboard Space Shuttle Craft (template included) If you've never watched a space shuttle launch, you really should! Even if you can't watch one in person, watching videos is spectacular as well. You can feel the excitement when the shuttle launches. And once you're done, make one of these cardboard space shuttle crafts to complete your lesson. A template is included to make it easier. The ...

Presents step-by-step instructions for folding twenty different kinds of paper airplanes and provides illustrated papers for 112 planes.

These colorful, easily assembled spaceships require neither rocket fuel nor dilithium crystals ? just scissors, tape, and paper clips. Best of all, they really fly! Simple instructions and diagrams with numbered folds assure aerodynamic perfection. Sixteen futuristic models include the Star Shuttle, Lunar Freighter, and Orbital Zoom Glider. 16 color illustrations.

As the National Aeronautics and Space Administration (NASA) retires the Space Shuttle and shifts involvement in International Space Station (ISS) operations, changes in the role and requirements of NASA's Astronaut Corps will take place. At the request of NASA, the National Research Council (NRC) addressed three main questions about these changes: what should be the role and size of Johnson Space Center's (JSC) Flight Crew Operations Directorate (FCOD); what will be the requirements of astronaut training facilities; and is the Astronaut Corps' fleet of training aircraft a cost-effective means of preparing astronauts for NASA's spaceflight program? This report presents an assessment of several issues driven by these questions. This report does not address explicitly the future of human spaceflight.

Reviews the circumstances surrounding the Challenger accident to establish the probable cause or causes of the accident. Develops recommendations for corrective or other action based upon the Commission's findings and determinations. Color

photos, charts and tables.

Suitable for ages 3-7, this book combines the fun of coloring with the thrill of folding and flying paper airplanes. Two copies of a dozen different themes include princess planes, jungle jets, and other playful motifs.

Looks at the operations of the International Space Station from the perspective of the Houston flight control team, under the leadership of NASA's flight directors, who authored the book. The book provides insight into the vast amount of time and energy that these teams devote to the development, planning and integration of a mission before it is executed. The passion and attention to detail of the flight control team members, who are always ready to step up when things do not go well, is a hallmark of NASA human spaceflight operations. With tremendous support from the ISS program office and engineering community, the flight control team has made the International Space Station and the programs before it a success.

Describes the design and function of the Hubble Space Telescope, its initial problems, and plans to repair it.

Advanced Technology for Human Support in Space was written in response to a request from NASA's Office of Life and Microgravity Sciences and Applications (OLMSA) to evaluate its Advanced Human Support Technology Program. This report reviews the four major areas of the program: advanced life support (ALS), environmental monitoring and control (EMC), extravehicular activities (EVA), and space human factors (SHF). The focus of this program is on long-term technology development applicable to future human long-duration space missions, such as for a hypothetical new mission to the Moon or Mars.

An introduction to opposites describes all sorts of feet doing all sorts of things.

Take a trip across the United States with Izzy and Jo and learn many interesting facts.
