Scoring of the PDMS-2. Scoring of the PDMS-2 is documented on the scoring profile or summary form. This is done after the administration of the test. The raw data scores are used in conjunction with the various appendices available in the PDMS-2 reference guide and the following standardised scores can be calculated from these: Age equivalents

Peabody Developmental Motor Scale (PDMS-2)—Physiopedi

When you build equipment, you need to decide how you want to model the object, just as you would if you were building a plastic model. The only difference in PDMS terms is that you model the object at full size rather than working to a scale. PrimitivesIn order to build an equipment item, you first need to decide what types of primitives to use.

PDMS-EQUIPMENT—|PDF-Document|

Equipment modeling in PDMS can be done by two methods: Using Primitives; Using Templates; Equipment Modeling Using Primitives. Primitives means different shapes or object which can be assembled together to create a required geometry of an equipment. These primitives can be modified to the required dimensions & orientation.
