To become licensed, engineers must complete a four-year college degree, work under a Professional Engineer for at least four years, pass two intensive competency exams and earn a license from their state's licensure board. Then, to retain their licenses, PEs must continually maintain and improve their skills throughout their careers.

What is a PE? - National Society of Professional Engineers

The Principles and Practice of Engineering (PE) exam tests for a minimum level of competency in a particular engineering discipline. It is designed for engineers who have gained a minimum of four years' post-college work experience in their chosen engineering discipline. For exam-specific information, select your engineering discipline.

NCEES PE exam information

PE licensure is the engineering profession's highest standard of competence, a symbol of achievement and assurance of quality. NSPE provides its members, whether already licensed or soon-to-be licensed, with the information and resources they need to earn and maintain the respected PE seal. NSPE does not license PEs.

A PE license is the highest standard of competence for a...

Candidates that are interested in taking the PE exam prior to the completion of your work experience requirement, also known as "Decoupling," should e-mail office@dape.org for further information. You'll need to apply for certification as an Engineer Intern. When your official transcripts are verified, you will be able to register for the exam on the NCEES website.
