Penguin Island is a satire on society and human nature in which morals, customs, and the origin of religion and laws are lampooned. For example, the origin of private property is presented as starting with the brutal and shameless murder of a farmer, and the seizure of his land, by a physically larger and stronger neighbour.

Penguin Island, published by Anatole France in 1908, is a comic novel that satirizes the history of France, from its prehistory to the author's vision of a distant future. After setting out on a storm-tossed voyage of evangelization, the myopic St. Maël finds himself on an island populated by penguins. Mistaking them to be humans, Maël baptizes them—touching off a dispute in Heaven and ushering the Penguin nation into history. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

Penguin Island in all its peculiar glory: this is the tale of the enchanted island island where the nearsighted Abbot Mael baptised penguins in error. These penguins ? possessed of Divine Grace by dint of baptism ? are remarkably like and unlike men; they rule the fictional land of Penguinia. (Jacketless library hardcover.) Copyright © Libri GmbH. Mael, a scion of a royal family of Cambria, was sent in his ninth year to the Abbey of Yvern so that he might there study both sacred and profane learning. At the age of fourteen he renounced his patrimony and took a vow to serve the Lord. His time was divided, according to the rule, between the singing of hymns, the study of grammar, and the meditation of eternal truths. A celestial perfume soon disclosed the virtues of the monk throughout the cloister, and when the blessed Gal, the Abbot of Yvern, departed from this world into the next, young Mael succeeded him in the government of the monastery. He established therein a school, an infirmary, a guest-house, a forge, work-shops of all kinds, and sheds for building ships, and he compelled the monks to till the lands in the neighbourhood. With his own hands he cultivated the garden of the Abbey, he worked in metals, he instructed the novices, and his life was gently gliding along like a stream that reflects the heaven and fertilizes the fields. At the close of the day this servant of God was accustomed to seat himself on the cliff, in the place that is to-day still called St. Mael's chair. At his feet the rocks bristling with green seaweed and tawny wrack seemed like black dragons as they faced the foam of the waves with their monstrous breasts. He watched the sun descending into the ocean like a red Host whose glorious blood gave a purple tone to the clouds and to the summits of the waves. And the holy man saw in this the image of the mystery of the Cross, by which the divine blood has clothed the earth with a royal purple. In the offing a line of dark blue marked the shores of the island of Gad, where St. Bridget, who had been given the veil by St. Malo, ruled over a convent of women. Now Bridget, knowing the merits of the venerable Mael, begged from him some work of his hands as a rich present. Mael cast a hand-bell of bronze for her and, when it was finished, he blessed it and threw it into the sea. And the bell went ringing towards the coast of Gad, where St. Bridget, warned by the sound of the bell upon the waves, received it piously, and carried it in solemn procession with singing of psalms into the chapel of the convent. Thus the holy Mael advanced from virtue to virtue. He had already passed through two-thirds of the way of life, and he hoped peacefully to reach his terrestrial end in the midst of his spiritual brethren, when he knew by a certain sign that the Divine wisdom had decided otherwise, and that the Lord was calling him to less peaceful but not less meritorious labours.

Penguin Island is a satirical fictional history by Nobel Prize winning French author Anatole France. It is concerned with grandnarratives, mythologizing heroes, hagiography and romantic nationalism. It is about a

fictitious island, inhabited by great auks, that existed off the northern coast of Europe. The history begins when a wayward Christian missionary monk lands on the island and perceives the upright, unafraid auks as a sort of pre-Christian society of noble pagans. Mostly blind and somewhat deaf, having mistaken the animals for humans, he baptizes them. This causes a problem for The Lord, who normally only allows humans to be baptized. After consulting with saints and theologians in Heaven, He resolves the dilemma by converting the baptized birds to humans with only a few physical traces of their ornithological origin, and giving them each a soul. Thus begins the history of Penguinia, and from there forward the history mirrors that of France (and more generally of Western Europe, including German-speaking areas and the British Isles). The narrative spans from the Migration Period ("Dark Ages"), when the Germanic tribes fought incessantly among themselves for territory; to the heroic Early Middle Ages with the rise of Charlemagne ("Draco the Great") and conflicts with Viking raiders ("porpoises"); through the Renaissance (Erasmus); and up to the modern era with motor cars; and even into a future time in which a thriving high-tech civilization is destroyed by a campaign of terrorist bombings, and everything begins again in an endless cycle. The longest-running plot thread, and probably the best known, satirizes the Dreyfus affair — though both brief and complex satires of European history, politics, philosophy and theology are present throughout the novel. At various points, real historical figures such as Columba and Saint Augustine are part of the story, as well as fictionalized characters who represent historical people. Penguin Island is considered a critique of human nature from a socialist standpoint, in which morals, customs and laws are lampooned. For example, the origin of the aristocracy is presented as starting with the brutal and shameless murder of a farmer, and the seizure of his land, by a physically larger and stronger neighbor.
