features of a perch to other organisms. MATERIALS Procedure 1. Put on safety goggles, gloves, and a lab apron. 2. Place a fish on a dissection tray with the head on your left. Use Figure 1 to

## Skills Practice Lab Perch Dissection

The perch is an example of a ray-finned fish. Its fins have spiny rays of cartilage &/or bone to support them. Fins help the perch to move quickly through the water and steer without rolling. Click [HERE](#) for more information about the fins found on the perch and their functions. The perch also has a streamline body shape that makes it well adapted for movement in the water.
