THE P6 ENGINE: A DESIGN AHEAD OF ITS TIME. While the Wolf and Leopard engines of the mid 1930s had put the Perkins Company on the map and demonstrated the practicality of the diesel engine in relatively small trucks and passenger cars, it was the next design conceived by Charles Chapman that was destined to be the most important engine produced in the early years.

**THE P6 ENGINE - Perkins longserviceclub**

The 4.236 Series is a family of automotive, industrial an d agricultural engines with power outputs from 76.0 to 37.5 kW (102.0 to 50.5 bhp). More than sixty years of diesel prod uction experience, together with the latest technology, have been applied to the manufacture of your engine to give you reliable and economic power.

**Perkins 4.236 Series**

For over 85 years, Perkins has led the field in the design and manufacture of high-performance diesel engines. With an engine range from .5 to 36 litres, Perkins engines power more than five thousand different applications throughout the world. And that's all thanks to our global network of manufacturing facilities that follow the same exacting process and quality standards at each and every location.
