Geometric Optics Simulation Used: Geometric Optics from the PhET at the University of Colorado. I. Theory: The lens equation: gives the relation between the distance from the object to the lens, d, the distance from the image to the lens, d., and the focal length of the lens. The focal length of a thin lens is given by: } = (sens Haurounding) in where R is the front radius of curvature, R, is the back radius of curvature.
