Education has been considered as the most important input and the most potent instrument for the development of an individual. It is the key to national prosperity and welfare and that no investment is too great for it. It is evident that education has a very important role to play in the economic and social development of the country, in the building up of the truly democratic society, in the promotion of national integration and unity, and above all for the transformation of individual in the endless pursuit of excellence and perfection. The students in a classroom have different socio-economic status, aptitudes, interests, attitudes etc. and among them have different IQ levels. In a classroom situation where the students are varied in learning levels, (i.e., average, below average and above average) most of the time teachers teach for the average, neglecting the above average and below average in their hurry to finish the syllabus. In the classroom the above average feel bored and the slow-learners remain passive and day-by-day become poor in the subject.

Criteria for Awarding School Leaving Certificates: An International Discussion focuses on formal and official evaluation of school learning and student achievement at the time schooling is discontinued. The book is based on the proceedings of the 1977 Conference of the International Association for Educational Assessment held at the Kenya Conference Center in Nairobi, Kenya on May 23-28, 1977. The selection first discusses school leaving examinations as a function of external and educational factors and the terms of reference for school leaving examinations. The book also takes a look at the comparability of grading standards in public examinations in England and Wales; basic assessment issues in school-leaving examination programs; and the case for school leaving examinations in The Netherlands. The text reviews the alternatives to school leaving examinations in Sweden and Brazil, as well as the abolition of final examination, transition from secondary school to higher education, and support structures. The book also ponders on the structure of secondary school system in Austria, Australia, Bermuda, Cyprus, Hong Kong, India, and Ireland. The selection is a dependable reference for readers interested in school learning and student achievement measurements.
