and literature. As I write, these videos have been viewed over 10 million times across 214 different nations. My GCSE English Youtube channel has over 60,000 subscribers. To accompany these videos, I have published over 20 revision guide eBooks-one of which you are currently looking at! My guide to the previous GCSEs in English language and literature sat at the top of the Amazon bestseller's list for over 45 weeks and achieved huge acclaim; this book aims to build on those strengths. In this ebook, you'll receive detailed guidance on every question in the AQA GCSE English Language exams. Please note that this ebook is not endorsed by or affiliated to any exam boards; I am simply an experienced teacher using my expertise to help students. However, if you read some of the 100+ reviews for this guide, you will see that it has already helped students, teachers and parents across the UK. As an extra bonus, this ebook contains links to five special video tutorials which are only available to those who purchase this guide. These links appear later in the text. I hope you enjoy the ebook. You should also purchase the accompanying eBook which covers the English Literature exams.

This report analyses how schools in England have interpreted and begun to respond to the government's 'self-improving school-led system' (SISS) policy agenda, an overarching narrative for schools policy since 2010 that encompasses an ensemble of reforms including academies, multi-academy trusts (MATs) and Teaching School Alliances (TSAs). Based on a large-scale, four-year, mixed-methods study, the report asks whether or not the models of co-ordination and school support emerging locally since 2010 represent a genuine basis for an equitable and inclusive 'school-led' system. It explores the factors that support and hinder such developments as well as the implications for

schools and school leadership. The analysis draws on governance theory to evaluate the reforms, which are conceived as an attempt to mix and re-balance three overlapping approaches to co-ordinating the school system: hierarchy, markets and networks. This shows that while one popular interpretation of the SISS agenda is that it requires inter-school partnerships to 'self-organize' their own 'school-led' improvement, this is in fact a partial account that underplays the dominant influences of hierarchical and market mechanisms on the thinking and actions of schools and school leaders and the networks they are developing. The report includes important new empirical findings, for example on the impact of MATs of different sizes and on the relationship between Ofsted inspection outcomes and levels of socio-economic stratification between schools. It also combines the perspectives of multiple case study schools across four different localities to provide rich insights into leadership decision-making and agency in the context of local status hierarchies and rapid policy-driven change. As a result, while focusing on changes in England, it provides a unique set of insights into how different governance regimes interact across different local contexts to influence patterns of schooling and school-to-school collaboration - insights that will have relevance for research and practice on school system governance more widely.

International Law has transformed and much transfused with other unknown fields in various sciences per se. AI Ethics is one of the emerging fields, where, policy intervention, in line with the idea of multilateralism has emerged merely recently. This emergence is not something pre-decided, but is usually gauged by some countries and some special non-state actors like the UN, for example, and non-state actors, which includes startups, NGOs and civil society actors most of the times. Works such as the Beijing Consensus on AI and Education, 2019, the 2017 Asilomar Conference on Beneficial AI, DARPA's conception of Explainable AI & many more have endorsed a sense of research aptitude and rationalization of the field of AI Ethics in Law, Policy and International Affairs. Our team of research contributors and analysts at the Indian Society of Artificial Intelligence and Law, have therefore at our very best, prepared a Handbook, in two parts, which caters to some important and influential fields of international law, and its synergy with AI Ethics. This handbook, with utmost humility is not some research encyclopedia. It serves to ignite curiosity and make people rethink or think differently about the way we see AI in our lives. It is a researched handbook, which has been edited by

Professor Suman Kalani, Chief Research Expert of ISAIL (also the Assistant Professor at the SVKM's Pravin Gandhi College of Law, Mumbai, India), Kshitij Naik, Chief Strategy Advisor of ISAIL, Akash Manwani, Chief Innovation Officer of ISAIL and me. We have tried to give crisp and detailed case studies on various dynamic fields of AI and international governance, which consist in AI & International Affairs, AI & Society, AI & Ecology, AI & Governance & other miscellaneous chapters, such as on Emerging Technologies and Applied Sciences. When you read the book, please do not treat it as some mere answer to all of your questions. Instead, relish the ideas and realities which have been expressed in this work. The chapters reflect some generic notions of international law, which have been widely accepted worldwide, and at the same time, might be an attempt to compel the readers to maybe come up with a reasonable policy intervention per se. We hope the readers would have a suitable time reading this book per se.
