One of the causes of a bad budgetary management system is that your budget is incomplete. When you create a household budget, you need to take every single home expense into account and try to plan for the unexpected. This includes gas for the car, money deposited into savings for unexpected expenses and setting aside entertainment money each week.

This handbook is designed as guidance for policymakers and practitioners to mainstream pro-poor environment and climate concerns into planning, budgeting and monitoring. Mainstreaming is achieved by putting poverty-environment issues at the heart of government—in other words, by taking these issues into mainstream economic decision-making processes, particularly the national and sub national planning and budgeting processes led by ministries of finance, planning and local government, and supported by ministries of environment.

Traditionally, economics training in public finances has

focused more on tax than public expenditure issues, and within expenditure, more on policy considerations than the more mundane matters of public expenditure management. For many years, the IMF's Public Expenditure Management Division has answered specific questions raised by fiscal economists on such missions. Based on this experience, these guidelines arose from the need to provide a general overview of the principles and practices observed in three key aspects of public expenditure management: budget preparation, budget execution, and cash planning. For each aspect of public expenditure management, the guidelines identify separately the differing practices in four groups of countries - the francophone systems, the Commonwealth systems, Latin America, and those in the transition economies. by Barry H. Potter and Jack Diamond, this publication is intended for a general fiscal, or a general budget, advisor interested in the macroeconomic dimension of public expenditure management.

Aaron Wildavsky was one of the most innovative and prolific scholars in the field of budgeting in our time. His work spanned a period of more than forty years, and its perspectives encompassed not only budgeting in the United States, but also its comparative and historical dimensions. As a leading political scientist, his research also ranged into American political institutions, public policy analysis, leadership, and biblical studies. This book pays tribute to Aaron Wildavsky by explicating his life and work, with

emphasis on his contributions to the field of public budgeting and finance. Larry Jones and Jerry McCaffery place Wildavsky's work within the context of previous work on budgeting. They show how some of the highlights of his immense output responded to and shaped questions in the field. Naomi Caiden reviews the way in which Wildavsky used budgeting as a window into other areas of politics. Richard Rose discusses how an American scholar became an internationally known one. Joseph White goes back to the beginning of Aaron's career and shows that budgeting in agencies and in Congress is still incremental for very powerful reasons. Allen Schick reviews the history of the federal budget process, brilliantly summarizing how much has changed. The festschrift poignantly assesses the

significance and influence of Aaron Wildavsky's work. It also includes some excerpts from Wildavsky's own writings in this area, and experiences of those who collaborated with him. In acknowledging Wildavsky's contributions to public budgeting and political science, this book also makes an original contribution to the field. It will be a necessary addition to the libraries of political scientists, economists, policymakers, not to mention all those who admired Aaron Wildavsky and his work.

By integrating their poverty reduction strategies (PRs), national budgets, and the corresponding reporting processes, low-income countries can strengthen domestic accountability and the implementation of pro-poor policies. Minding the

Gaps, based on nine low-income country case studies and a review of relevant experience in four higher-income countries, offers practical insights for donors and national governments on how to strengthen the links between PRSs and budgets. PRS countries' efforts to integrate policy with budgeting processes have often had limited effect. Their policy making, planning, and budgeting are often embedded in fragmented processes and institutions. Going beyond mainly technical fixes that have been commonly used to address this fragmentation, this study frames domestic accountability in terms of ownership and incentive structures. Experience counsels the use of a simple approach that is not too ambitious. This approach should be centrally led and make use of existing systems while gradually

improving them. It should build support from within and foster incentives for integration, for example by better linking PRS and budget reporting to actual decision-making processes. Also, simple budget reforms can significantly improve the budget's responsiveness to policies. Structuring a poverty reduction strategy paper in a more budget friendly manner can facilitate the interface with the budget by involving sector agencies more closely in elaborating policy priorities and establishing resource implications. It can also expand ownership and boost incentives for integration of a great number of stakeholders, thereby strengthening domestic accountability.
