This new color edition is essential for the enthusiast who wants to get the most performance out of this new engine design but is only familiar with the older Chevy small-blocks. Covered is everything you need to know about these engines, including the difficult engine removal and installation, simple engine bolt-ons, electronic controls for the Generation III engine, and detailed engine builds at four different power levels.

Looks at the combustion basics of fuel injection engines and offers information on such topics as VE equation, airflow estimation, setups and calibration, creating timing maps, and auxiliary output controls.

Written by renowned modelling expert and TV visual effects designer Mat Irvine, the Model Builders' Manual provides a practical guide for both novice and experienced model builders, showing how to obtain professional results, with a focus on plastic model kits. In addition to the practicalities of building models, this introduction to modelling covers the history of how the modern kit industry developed, how a model kit is designed, the range of tools and paints available to build models, the origins and variety of the various scales, collecting models and model clubs. Practical coverage includes details of basic building techniques, painting and spraying, decals and dioramas, plus techniques associated with predominantly plastic-based hobby kits such as white metal, photo-etch and resin components.

With 18 years of research on the Pontiac Grand Prix, Don Keefe takes the reader on a voyage that covers nearly a half century, from the earliest design sketches of the late 1950s, bringing the concept to market, all production figures to date, to the exciting Grand Prix of today. Not simply a rosy depiction of the Grand Prix 's history, the
