Postcolonial Studies and Beyond.

Book Description: An interdisciplinary collection of essays designed to map out a wide-ranging and productive future for postcolonial studies, this volume assesses the current state of the field and points toward its most promising new developments. In addressing questions about the definition and relevance of postcolonial scholarship, many of the essays consider its relation to the study of globalization.

This interdisciplinary volume attempts to expand the temporal and geographic agenda of postcolonial studies.

Opposing the orthodoxies of establishment post colonialism, this work posits acts of resistance and subversion by people of colour as central to the unfolding dialogue with Western hegemony. It questions the various cliches that stereotype third world cultures.

modern period in Europe and subsequently became globalized through colonialism. Despite the historical and cultural specificity of its origins, modern Western knowledge was thought to have transcended its particularities such that, unlike pre-modern and non-Western knowledges, it was "universal," or true for all times and places. In this bold and ambitious book, Sanjay Seth argues that modern knowledge and the social sciences are a product of Western modernity claiming a spurious universality: that what we treat as the "truths" discovered by social scientific reason are instead a parochial knowledge. Drawing upon and deriving its critical energies principally from postcolonial theory, *Beyond Reason* traverses many disciplines, including science studies,

social history, art and music history, political science, and anthropology, and engages with a range of contemporary thinkers including Butler, Habermas, Chakrabarty, Chatterjee, and Rawls. It demonstrates that while global in their impact, the social sciences do not and cannot transcend the Western historical and cultural circumstances in which they emerged. If the social sciences are not explained and validated simply by the fact that they are "true," it becomes possible to ask what purpose they serve, what it is that they "do." A defining feature of modern knowledge is that it is divided into disciplines, each with its own object of inquiry and corresponding protocols, and thus asking what such knowledge "does" requires asking

It also requires asking what ways of understanding the world they facilitate and what they disallow. *Beyond Reason* proceeds to anatomize the disciplines of history and political science to ask what representations and relations with the past and with politics these academic disciplines enable, and what ways of understanding and engaging the world they foreclose.

The book foregrounds the ways in which the work of Bourdieu could be read in conjunction with ' poststructural ' theorists such as Butler and Derrida to offer a critical understanding of subjectivity, language and power in postcolonial contexts. This critical engagement with theorists traditionally from outside of psychology allows for a situated approach to understanding the embodied and symbolic possibilities and constraints for the postcolonial subject. Also drawing on the empirical findings of original research undertaken in the South African context on students' linguistic biographies, the book offers a unique perspective – critical social theory is brought to bear on the empirical linguistic biographies of postcolonial subjects, offering insight into how power is negotiated in the postcolonial symbolic economy. Ideal for advanced undergraduate and postgraduate students on courses including social psychology, sociolinguistics, sociology, politics, and education, this is an invaluable resource for students and researchers alike.
