Hearing and Deafness presents an overview on the impact of hearing on the development of speech, language, and literacy in English in children and adolescents who are deaf/hard of hearing. This text presents up-to-date information on an array of critical areas in speech and hearing such as hearing aids, cochlear implants, speechreading, aural rehabilitation, and the necessary constructs for developing English language and literacy. This text will provide students

with the knowledge required to develop effective skills that can be used in their professional work settings. Hearing and Deafness i

Listening: Processes, Functions, and Competency, Second Edition explores the role of listening as an essential element in human communication. The book addresses listening as a cognitive process, as a social function, and as a critical professional competency. Blending theory with practical application, Listening builds knowledge, insight, and skill to help the reader achieve the desired outcome of effective listening. This second edition introduces listening as a goal-directed activity and has been expanded to include a new chapter addressing listening in mediated contexts. Theory and research

throughout the text have been updated, and the final chapter covers new research methodologies and contexts, including fMRI, aural architecture, and music.

Hearing Maskanda outlines how people make sense of their world through practicing and hearing maskanda music in South Africa. Having emerged in response to the experience of forced labour migration in the early 20th century, maskanda continues to straddle a wide range of cultural and musical universes. Maskanda musicians reground ideas, (hi)stories, norms, speech and beliefs that have been uprooted in centuries of colonial and apartheid rule by using specific musical textures, vocalities and idioms. With an autoethnographic approach of how she came to

understand and participate in maskanda, Titus indicates some instances where her acts of knowledge formation confronted, bridged or invaded those of other maskanda participants. Thus, the book not only aims to demonstrate the epistemic importance of music and aurality but also the performative and creative dimension of academic epistemic approaches such as ethnography, historiography and music analysis, that aim towards conceptualization and (visual) representation. In doing so, the book unearths the colonialist potential of knowledge formation at large and disrupts modes of thinking and (academic) research that are globally normative.

This book details a study of sign language brokering that is carried out by deaf and hearing people who grow up using sign language at home with deaf parents, known as heritage signers. Child language brokering (CLB) is a form of interpreting carried out informally by children, typically for migrant families. The study of sign language brokering has been largely absent from the emerging body of CLB literature. The book gives an overview of the international, multi-stage, mixed-method study employing an online survey, semi-structured interviews and visual methods, to explore the lived experiences of deaf parents and heritage signers. It will be of interest to practitioners and academics working with signing deaf communities and those who wish to pursue professional practice with deaf communities, as

Osama bin Laden's demise in May 2011 marked only the symbolic end of an era. By the time of his killing, he no longer represented the Robin Hood icon that once stirred global fascination. Ten years after the 11 September 2001 attacks, jihadi terrorism has largely lost its juggernaut luster. It now mostly resembles a patchwork of self-radicalising local groups with international contacts but without any central organisational design - akin to the radical left terrorism of the 1970s and the anarchist fin-de-siècle terrorism. This volume addresses two issues that

remain largely unexplored in contemporary terrorism studies. It rehabilitates the historical and comparative analysis as a way to grasp the essence of terrorism, including its jihadi strand. Crucial similarities with earlier forms of radicalisation and terrorism abound and differences appear generally not fundamental. Likewise, the very concept of radicalisation is seldom questioned anymore. Nevertheless it often lacks conceptual clarity and empirical validation. Once considered a quintessential European phenomenon, the United States too experiences how some of its own citizens radicalise into terrorist violence. This collective work compares radicalisation in both continents and the strategies aimed at de-radicalisation. But it also assesses

if the concept merits its reputation as the holy grail of terrorism studies. The volume is aimed at an audience of decision makers, law enforcement officials, academia and think tanks, by its combination of novel thinking, practical experience and a theoretical approach.

Anyone who wants to be more successful at work or at home will find important, new advice in Listen Up. While there are hundreds of books on how to express ourselves clearly, most of us haven't learned how to listen effectively. The second addition of Listen Up! offers practical information, tips and explains: * Why the listener, not the speaker, controls the conversation * The four basic listener styles - People-, Action-, Content-, and Time-Oriented listeners How to use

Professor Alfred Tomatis. This book can be considered as a standard work to establish the proper execution of the original Tomatis method. It pays tribute to Professor Alfred Tomatis' pioneering work. It provides an insight into why and for what disabilities the method works so well. A wealth of scientific validations and cases are presented to illustrate this as an aid for practitioners as well as for potential clients and to convince the outside world. Details encompass anatomy, neurology, and physiology, pathology, psychology along with interpretations of listening tests, programming and equipment. It serves both therapists and clients, as well as generally interested persons and medical or educational institutions.

introduces and illustrates the array of strategies and methods used in New Testament study today. Standard approaches -- text criticism, historical methods, etc. -- appear side by side with newer approaches -- narrative criticism, Latino-Latina hermeneutics, theological interpretation of the New Testament, and more. First published in 1995, *Hearing the New Testament* is now revised and updated, including rewritten chapters, new chapters, and new suggestions for further reading. Now in its second edition, this reader-friendly text offers a comprehensive treatment of concepts and knowledge related to teaching second language (L2) listening, with a particular emphasis on metacognition. This book advocates a learner-oriented approach to teaching listening that focuses on the process of learning to listen. It applies theories of metacognition and language comprehension to offer sound and reliable pedagogical models for developing learner listening inside and outside the classroom. To bridge theory and practice, the book provides teachers with many examples of research-informed activities to help learners understand and manage cognitive, social, and affective processes in listening. Comprehensively updated with new
