Your preparation for the TestAS 2021 With our books, get everything you need to achieve a high test score. The TestAS (Test for Academic Studies) is a study aptitude test for applicants from non-EU countries who want to study in Germany. Start preparing for the TestAS now to improve your chances of being admitted to a German university. Our books completely cover the Core Test and the Subject Module "Mathematics, Computer Science and Natural Science" and prepare you efficiently for the test day. The key to success lies in having learned and practiced in the best possible way for the exam: Achieve an above-average test score based on our strategies and practice questions. Included in The Practice Test for the TestAS Mathematics, Computer Science and Natural Sciences are:

- One complete practice test for the subject module "Mathematics, Computer Science and Natural Sciences"
- The Core Test with four subtests and the Subject Module with two subtests
- A total of 132 questions
- Detailed answers and solutions

Our series for the TestAS Subject Module Mathematics, Computer Science and Natural Sciences:

1. Preparation Book for the TestAS Mathematics, Computer Science and Natural Sciences: Analyzing Scientific Interrelationships
2. Preparation Book for the TestAS Mathematics, Computer Science and Natural Sciences: Understanding Formal Depictions

The Practice Test for the TestAS Mathematics, Computer Science and Natural Sciences

Our series for the TestAS Core Test:

1. Preparation Book for the TestAS Core Test: Guideline for the TestAS and Completing Patterns
2. Preparation Book for the TestAS Core Test: Solving Quantitative Problems
3. Preparation Book for the TestAS Core Test: Inferring Relationships and Continuing Numerical Series

This book presents a technical review of ecological and life history information on a range of Bornean wildlife species, aimed at identifying what makes these species sensitive to timber harvesting practices and associated impacts. It addresses three audiences: 1) those involved in assessing and regulating timber harvesting activities in Southeast Asia, 2) those involved in trying to achieve conservation goals in the region, and 3) those undertaking research to improve multipurpose forest management. This book shows that forest management can be improved in many simple ways to allow timber extraction and wildlife conservation to be more compatible than under current practices. The recommendations can also be valuable to the many governmental and non-governmental organisations promoting sustainable forest management and eco-labelling. Finally, it identifies a number of shortcomings and gaps in knowledge, which the hope can interest the scientific community and promote further research. This review is, an important scientific step toward understanding and improving sustainable forestry practices for long-term biodiversity conservation. Even in the short term, however, significant improvements can be made to improve both conservation and the efficiency of forest management, and there is no need to delay action due to a perceived lack of information. In the longer term it is expected that the recommendations from this review will be implemented, and that further research will continue to help foster an acceptable balance among the choices needed to maintain healthy wildlife populations and biodiversity in a productive forest estate.
