To get started we first need to load a operating system onto our SD card. The Raspberry Pi runs a linux based operating system called Raspbian. The Raspbian operating system has a window based UI much like windows and is easy to setup and use. In order to install Raspbian we need to first download it from the Raspberry Pi website here. Make sure you download the version with the desktop.

[Getting started with Python programming on the Raspberry Pi](#)

The Raspberry Pi is a mini-computer that allows you to build all sorts of custom projects, such as learning to build your own computing hardware or getting started with programming languages like Python or Scratch. It comes with no peripherals, meaning that the Raspberry Pi will be exactly what you make of it. \$39 at Amazon \$35 at Best Buy

[5 easy steps to getting started using Raspberry Pi | iMore](#)

I have not done any programming since BASIC and Pascal in high school -- like a million years ago. I am somewhat intimidated by learning a new programming language. I do not even know what languages those miniature computers use. I know that I can buy starter kits for Pi Zero and the like from places like Adafruit, but that is as much as I know.
