Rational Roots Theorem and Factoring/Solving 3 Rational Root Theorem If $P(x) = 0$ is a polynomial equation with integral coefficients of degree n in which a_0 is the coefficients of x^n , and a_n is the constant term, then for any rational root p/q , where p and q are relatively prime integers, p is a factor of a_0 and q is a factor of a_n . $0 = a_0 x^n + a_1 x^{n-1} + \dots + a_n$ That's math talk.

Rational Root Theorem Worksheet rational root theorem kuta will manage to pay for Page 3/6. Where To Download Rational Root Theorem Kuta you more than people admire. It will guide to know more than the people staring at you. Even now, there are many sources to learning, reading a scrap book still

Rational Root Theorem Kuta By the rational root theorem, if $r = a/b$ is a root of $f(x) = a_n x^n + \dots + a_0$, then a divides a_0 and b divides a_n . But since p and q are relatively prime, p divides a_0 and q divides a_n . Thus $r = a/b$ is an integer.
