Reconstructing Urban Economics : Towards a Political

...

Urban economics is broadly the economic study of urban areas; as such, it involves using the tools of economics to analyze urban issues such as crime, education, public transit, housing, and local government finance. More specifically, it is a branch of microeconomics that studies urban spatial structure and the location of households and firms. Much urban economic analysis relies on a particular model of urban spatial structure, the monocentric city model pioneered in the 1960s by William Alonso

Urban economics - Wikipedia

He has recently published Reconstructing Urban Economics: Towards a Political Economy of the Built Environment (Zed Books, 2016) The shift of world populations into cities and the increasing concentration of activities in urban areas have generated new debates about cities as well as rejuvenating old debates, turning them into global concerns.
