Reinforced soil is a composite
construction material formed by
combining soil and reinforcement.

Reinforced Soil and Geosynthetic Engineering

This book is intended to serve as a
one-stop reference on fibre-reinforced
soils. Over the past 30-35 years, the
engineering behaviour of randomly
distributed/oriented fibre-reinforced
soil, also called simply fibre-reinforced
soil, has been investigated in detail by
researchers and engineers worldwide.
Waste fibres (plastic waste fibres, old
tyre fibres, etc.) create disposal and
environmental problems.
