create Curol, even though they are not Botana curus (the plants that does produce it). □Comparison of data to determine relationships. □Define the crucial need for biodiversity.

Relationships and Biodiversity NYSED Lab Review
This lab has 7 tests used to determine the relatedness of 4 plant samples. Remember that scientists use a variety of evidence to determine evolutionary relationships, including cell types, structural morphology, DNA, behavior, embryology, and fossils. The more criteria that are shared between organisms, the more likely they are closely related.
