Relic is a 1995 novel by American authors Douglas Preston and Lincoln Child, and the first in the Special Agent Pendergast series.As a horror novel and techno-thriller, it comments on the possibilities inherent in genetic manipulation, and is critical of museums and their role both in society and in the scientific community. It is the basis of the film The Relic (1997).

Relic (novel) - Wikipedia

Relic is the first book in the Pendergast series co-written by Douglas Preston and Lincoln Child. I'd heard of the books and knew they were highly recommended, but I never dove into them. Recently, a blogger friend suggested I give the series a chance (thanks Mae), so I ordered Relic from the library and read this 1995 hit.

Relic (Pendergast, #1) by Douglas Preston

The Relic by Douglas Preston and Lincoln child is a masterpiece!! The Relic's been compared to Crichton's 2 Jurassic Park novels, and it's hard not to see why. They're all really well written in the same scary & suspenseful style and both use themes of genetics and evolution, not to mention the creature/monster aspect of both. PLOT:-----In the weeks leading up to the massive opening of a new ...

Relic is the 1st Pendergast novel, and it is set in the Museum of Natural History in NYC -- one of my favorite haunts growing up there in the '50s and '60s. After reading this horrific, but well-written book, I'm not sure I'd brave the museum again. The book is truly terrifying. I wish it had been about 75 pages shorter.

The plot of "Relic" had the potential to flop, since it tells an improbable monster story. But Preston/Child's excellent writing and thorough research facilitate our willing suspension of disbelief, rendering even the most far-fetched plot concepts scientifically plausible.
