This new book, based on a highly successful series of articles in Practical Boat Owner magazine, is a detailed practical guide to sailing around the UK - all by means of day sails. Roger Oliver, a passionate sailor, explains his in-depth passage planning, boat preparations, weather checks and log-keeping, as well as his choice of routes, detailed navigation, sail trim tips and on-passage maintenance, all for the benefit of sailors who have a yen to follow in his footsteps. Packed with a wealth of practical tips on seamanship, anchoring in high winds, coping with big seas, problem-solving, harnessing the tide, sailing short-handed and living aboard for extended cruising, this book will be a godsend to the many thousands of sailors who enjoy coastal cruising and who will discover (as did Roger) that it is perfectly possible to cruise around the whole of the UK in a series of day sails. With this book to hand, and inspired by Roger's detailed route maps and spectacular photographs, anyone can experience the thrill and enjoyment of sailing around the beautiful and varied UK coast from any starting point.

A Vertical Empire describes the work in rocketry and space research carried out in the UK in the 1950s and 1960s. At one time, the programme was as sophisticated as those in the US and Russia. The projects were cancelled one by one as Britain's attempts to keep up militarily with the two superpowers weakened, as a consequence of Treasury pressure and the belief that there was no economic future in space technology. Much of the material in this invaluable book has never been available before, due partly to the 30-Year Rule concerning government documents, and partly to the sensitive military nature of the work. The projects covered include rocket-propelled aircraft, large military missiles such as the medium range ballistic missile Blue Streak, the test rocket Black Knight and the re-entry experiments it carried, and the satellite launcher Black Arrow. In addition, proposed projects that could have been developed from these vehicles are covered in depth. There is also considerable political analysis of why these projects were eventually discontinued. Contents: Rocket Motors Rocket Interceptors The Blue Steel Stand Off Missile Blue Streak: The Origins Blue Streak: The Cancellation BSSLVELDO and Europa Black Knight Black Arrow The Could Have Beens The UK and Space Readership: Readers interested in the history of technology and aerospace enthusiasts. Reviews: "Much of the material published has never been available before, due partly to the 30-year rule covering government documents and partly due to the sensitive military nature of the work. It makes the book invaluable, particularly as a political analysis and commentary of why the nation's trail-blazing projects in space technology were discontinued." Spaceflight "It's a book enjoyed by those with an interest in engineering and the history of British

technology ... there are no other books on the market about this topic and I'd still rate it highly."Popular Astronomy

Phase 1 of the EPSRC SUPERGEN Wind programme began in March 2006 and work continued under Phase 2 until March 2014. The strategic aim was to re-establish a strong research community in wind energy technologies, across the UK's leading academic and industrial research organisations. UK Wind Energy Technologies gives a comprehensive overview of the range of wind energy research undertaken in the UK under Phases 1 & 2 to achieve this goal. Specific topics covered in the book include: wind resource assessment, turbine array layout, environmental interactions, control of turbines, drive train reliability and condition monitoring, turbine array electrical connection, power transmission to grid, assessment of operations and maintenance strategies, and the analysis of turbine foundations and structures. Since the completion of Phase 2 the Supergen Wind consortium partners have formed a networking Hub, which is now the principal national coordinating body for academic research into wind energy in the UK. This book will be of interest to researchers and engineers from industry and academia and also provides workers from other countries with an overview of the range of activity within the UK resulting from the SUPERGEN Wind programme to date.

The Government must start thinking strategically about energy security to protect the UK's energy supply against short-term shocks and rising global energy prices, according to a report by MPs on the Energy and Climate Change Committee. Gas storage capacity needs to be increased in the UK to minimise the potential damage from supply interruptions or price spikes, the report argues. It reveals that the UK's current storage capacity amounts to only 14 days worth of gas supply - a dangerously low level compared with France which has 87 days worth of gas storage, Germany 69 and Italy 59. 19 gigawatts (GW) of ageing electricity plant will close by 2018 and the UK will become increasingly reliant on energy imports as North Sea oil and gas reserves decline. The report concludes that new electricity generation currently being built or planned will fill this "gap". But it urges the Government to ensure security of supply by delivering on its energy efficiency targets, rolling out smart meters - that can balance demand - and maintaining a diverse energy mix.

"The new circumnavigation bible" - Geoff Holt (the first disabled sailor to sail around Britain singlehandedly) A circumnavigation of the UK and Ireland is the perfect 'doorstep' challenge for sailors and motorboaters looking for an extended cruise which doesn't take them too far from family and responsibilities and allows them to keep in touch. It doesn't require extended time off work, or linguistic ability if things go wrong - and the coastline is beautiful! This book is a practical guide and Sam gives advice on planning and preparation: when to leave, whether to go clockwise or anti, what charts are needed, how much it is likely to cost, possible routes (via canals or

'the long way'), what stores and equipment are needed, likely pitfalls en route, and what types of running maintenance might be required. For the second edition she has added a '10 of the best' section detailing 'unmissable' places in a range of categories from remote bays and beautiful rivers to historic locations and anchorages. UK and Ireland Circumnavigator's Guide is perfect for all those sailors and motorboaters planning as well as dreaming of one day circumnavigating Britain's beautiful islands. 'A comprehensive guide to sailing (or motor boating) round Britain' Sailing Today- Highly Recommended Title

The new Rough Guide to England is the definitive insider's guide to a country rich in history, heritage and culture. Now in full colour throughout, this fully updated guide has clear maps, detailed itineraries and regional highlights. Now available in ePub format. There's practical information and advice on visiting England's beautiful countryside and coastline, as well as the many diverse cities, towns and picture-postcard villages. Don't miss a thing with up-to-date reviews of the best places to stay, from boutique hotels to budget hostels, the most authentic pubs and new-on-the-scene restaurants, and the most exciting activities and experiences. Whether you're camping on a remote Cornish peninsula, hiking in the Peak District, being pampered in a spa town or browsing markets in London's East End, explore every corner of this superb country with easy-to-use maps and detailed sights information. Make the most of your time on Earth™ with The Rough Guide to England.

We are pleased to welcome you to the eleventh edition of the Middleware conference. The program this year is a sign of the robustness, activity, and continued growth of the Middleware community. As computing technology around us has evolved rapidly over the past decade, our notions of middleware have also adapted so that we stay focused on the most challenging and relevant problems for the present and future. As a result, this year's program features papers that belong to both traditional areas as well as new directions. Cloud computing, social middleware, and transactional memory are some of the vanguard areas that you will find in this year's selection of papers. In addition, topics that have always been central to the community are also prominent this year, including publish-subscribe, multicast, reliability, legacy, location-awareness, trust, and security. The community's wise evolution reflects the dynamic role that middleware continues to play in the development of current software systems. The program underscores the competitive selection process applied by us and the technical program committee: out of 116 papers submitted this year, we accepted 18 for regular publication. In addition Middleware 2010 also includes a new category of "Big Ideas Papers," which are bold white papers with the potential to drive longer-term innovation in the field. We selected one "big ideas" paper this year. Our industrial track once again brings forth papers that explore middleware

foundations in the context of industrial practice. Finally, multiple workshops and a doctoral symposium round off Middleware this year, making it an attractive conference for students, faculty, researchers, and practitioners.

The Concise New Partridge Dictionary of Slang and Unconventional English presents all the slang terms from The New Partridge Dictionary of Slang and Unconventional English in a single volume. Containing over 60,000 entries, this concise new edition of the authoritative work details the slang and unconventional English of from around the English-speaking world since 1945, and through the first decade of the new millennium, with the same thorough, intense, and lively scholarship that characterized Partridge's own work. Unique, exciting and, at times, hilariously shocking, key features include: unprecedented coverage of World English, with equal prominence given to American and British English slang, and entries included from Australia, New Zealand, Canada, India, South Africa, Ireland, and the Caribbean emphasis on post-World War II slang and unconventional English dating information for each headword in the tradition of Partridge, commentary on the term's origins and meaning. New to this second edition: a new preface noting slang trends of the last eight years over 1,000 new entries from the US, UK and Australia, reflecting important developments in language and culture new terms from the language of social networking from a range of digital communities including texting, blogs, Facebook, Twitter and online forums many entries now revised to include new dating and new glosses, ensuring maximum accuracy of content. The Concise New Partridge Dictionary of Slang and Unconventional English is a spectacular resource infused with humour and learning - it's rude, it's delightful, and it's a prize for anyone with a love of language.

Parallel processing is a key topic which is becoming more important as the technology becomes more widespread. UK Parallel '96 - Proceedings of the BCS PPSG Annual Group is the publication of the academic programme from the first in an annual series of national conferences covering the broad area of parallel and distributed computing. It was coordinated by the BCS Parallel Processing Specialist Group and provided a focus for both research and industrial presentations. This first conference was held at the University of Surrey in July 1996, and contains work from a number of universities within the UK. The scope of the proceedings illustrates the breadth of the work being undertaken in the UK and includes a variety of papers covering a number of important areas, including: compiler development for both data-parallel and message passing languages and the development of application specific software.
